

PRESIDENT HAS PERILOUS TRIP THROUGH FLOOD

Taft Train Is Caught in Center of Kansas Storm.

HELD UP SEVEN HOURS Reaches Omaha But Nebraska Schedule Is Broken.

OMAHA, Oct. 1.—President Taft arrived here tonight from Sedalia, Mo., eleven hours late, after a somewhat perilous trip over the flood damaged railroads.

The Taft train was caught in the center of a storm in northeastern Kansas and eastern Nebraska, during which it was estimated eight inches of water fell. Cretes were turned into torrents, rivers, overflowed, and railroad travel was impeded in all directions.

Several small bridges were swept away and in the early forenoon a portion of the trucks over which the President traveled were covered with more than a foot of water.

The Taft special was held out at Rushville, Mo., for seven hours and there was a two-hour delay at Ralls City waiting for the flood to subside. Section hands along the Missouri-Pacific system were ordered out by the train.

Every possible care was taken to insure the President's safety and before his train was sent over the dangerous stretches a pilot train, pulled by the heaviest engine on the system had preceded it and a thorough test had been made of the emergency repairs.

It was by far the most dangerous railroad situation the President has been in during any of his travels.

Taft did not seem to mind the inconvenience or the danger in the least, although expressing regret that the program arranged for him in Omaha today had to be abandoned.

The President stood on the rear platform of his car as the train crawled over the flooded tracks. At times the water was within an inch of the top of the rails.

General Manager De Barnard of the Missouri Pacific system took charge of the President's train and brought it through to Omaha, the first train to get out of the flooded district.

At Omaha the President's train was met by a large number of people, and the President was taken to the hotel.

The heavy Presidential train caused the track near Verdun, Neb., to sag dangerously, but it got safely over and from there on, it was easy traveling, although for several hours the train passed through a flooded country, farms being inundated to a depth of from three to four feet.

FOWLER CHINESE QUARTER BURNS; LOSS IS \$50,000

Early Sunday Morning Fire Destroys Homes of 300 People.

THE LOSS IS UNUSUAL Water Supply Found to Be Inadequate to Fight Flames.

Fowler's Chinese quarter was wiped out by fire at 1:30 o'clock yesterday morning, the flames causing a loss of over \$50,000. Twenty-three frame structures, one story in height, stood in the path of the flames and by 2:30 all had been reduced to ashes. Today only one building stands in Chinatown and this is a brick structure which withstood the fury of the blaze.

Ten years ago the same section was visited by fire and at that time a loss of \$25,000 was recorded. Since then the quarter had been rebuilt. Yesterday's fire destroyed the homes of 300 Chinese and Japanese. The blaze started in the rear of a Japanese pool hall where a small fire had been built.

The wind blew the blaze against the wall and within five minutes the row of buildings was a smoking mass of burning flames.

The residents of Fowler were awakened from their early morning slumbers by three rapid shots fired by Marshall Bishop. The town bell was rung several times and hundreds rushed to the scene only to find that the water supply was inadequate to cope with the situation.

Not until an attempt was made to pump water was it discovered that the high winds of Saturday had blown down the electric lines leading into Chinatown. The water pumps are run by motors with no emergency engine and the entire city was without water yesterday.

George Seure, who has the contract for rebuilding the quarter, was surprised yesterday by Fowler people for not having an emergency engine to use when the electric power is shut off.

Owing to the high rate charged, very little insurance was carried by the Chinese and the loss of \$50,000 will not be reimbursed to any extent. Sam Kee of Fresno is the heaviest individual loser. His setback is about \$20,000. Kee stated last night that he would immediately employ the money on his property and build a new two-story brick structure to cost \$30,000.

At Verdun the President's train passed two other trains headed for the south but held up by the storm. On one of these was a theatrical troupe which included about fifty chorus girls. As the President's train moved by, the girls stuck their heads out of the window and threw kisses at the chief executive.

Arriving here the President was taken to the Omaha club for dinner and spent the evening there. He will leave for Lincoln and Denver at 10 o'clock tomorrow.

Taft shook his head, but the girl kept up the quest until she stepped into a puddle of water and hit but fell headlong into the muddy roadway.

Arriving here the President was taken to the Omaha club for dinner and spent the evening there. He will leave for Lincoln and Denver at 10 o'clock tomorrow.

AVIATOR'S LIFE ENDANGERED BY INDIANA STORM

HUNTINGTON, Ind., Oct. 1.—C. P. Rodgers, who is contesting for a prize of \$50,000 in a flight across the continent, landed here this afternoon at 4:28 after a trip in which his life was endangered several times.

In the course of his flight, Rodgers ran into three rainstorms and for several hours was lost to sight. Rodgers landed at Geneva, where he remained until 2:28 this afternoon when he took up his flight to this city, again encountering severe storms.

Rodgers says he will start for Chicago at 7 o'clock tomorrow morning.

FRUIT DAMAGED HEAVILY BY RAIN IN SANTA CLARA

(Special to the Republican.) SANTA CLARA, Oct. 1.—A rainstorm which began this afternoon shortly after 2 o'clock and continued for an hour, did thousands of dollars worth of damage to grapes, beans and pears in this valley.

The storm lasted only about an hour and then cleared suddenly, but the damage was done. The late grapes, especially in the lower end of the valley, will be cradled by the moisture, and beans and other vegetables will suffer considerably. How greatly cannot be told for a day or two.

EIGHT CHILDREN BURNED TO DEATH IN PENNSYLVANIA

INDIANA, Pa., Oct. 1.—Eight children of Mr. and Mrs. William Dias of Heshbon, near here, ranging in ages from 12 years to three months, were burned to death early today when fire destroyed the home. The parents left the children in their beds and went to the first floor where they made an attempt to extinguish the fire.

The blaze spread rapidly and they were unable to return to the rescue.

GREAT NAVAL BATTLE IN THE DARDANELLES; DISASTER TO TURKEY ONCE MORE RUMORED

No News From Tripoli--Austria and Germany Said To Resent Italy's Attack on Prevesa ---Neutrality Act Delayed.

PARIS, Oct. 2.—The Agence. Fournier at midnight sent out the following Rome dispatch dated October 1: "A telegram from Constantinople to the Tribuna says that all consuls at the Dardanelles have telegraphed that a naval battle is going on in the straits. Reports of guns are heard as far as the Bosphorus."

At 1:30 o'clock this morning the same agency sent out a Rome dispatch dated October 2nd, saying: "News of the destruction of the Turkish fleet seems to be confirmed."

LONDON, Oct. 1.—The Daily Chronicle's Constantinople correspondent says: "News of both disaster and victory reached the capital today. The fighting spirit of the Turks is rising to a fanatical height. A wireless message to the admiralty says that two Italian cruisers have been sunk off an unnamed point in the Archipelago. It is presumed that the torpedo boats had a hand in this affair."

"Rigorous precautions are being taken to thwart the movements of the Italian fleet to the Archipelago. An excited crowd at Stamboul today attacked the Italian postoffice. An Italian steamer with a valuable cargo has been captured near the entrance to the Bosphorus."

"It is rumored that Prevesa, in European Turkey, has been taken by the Italians and several Turkish ships without coal have been seized. Close secrecy is observed as to the movements of the Turkish warships and the newspapers are forbidden to publish any news."

INTERVENTION HOPED FOR. "Much is hoped for from intervention by the powers, but it is reported that the Sultan's personal appeal to the King of England has effected a reply to the effect that it is too late for the powers to take any such political action as Turkey desires."

"An eloquent commentary on the indecision of the former cabinet is the sight of several Turkish warships with their life in the Golden Horns. The opinion is held in some quarters that Turkey will not be able to hold out for long; this despite the intense desire of the people to fight to the last."

"Victims are compelling themselves in great numbers to many places. Turkey has no money. All around the frontiers is unrest and hasty preparations. Turkey's chronic trouble, the lack of ready money, has become acute. She is fastening the war with a ridiculous small sum in the treasury. The Ottoman public debt institution has been asked to provide \$50,000,000, but it has informed the government that there is no more money available. The reform the nation is going to war with about 100,000,000."

"Extra forces are in the capital to prevent anti-Italian disorders. The Italian charge, Signor Di Martino, left today."

DR. LYMAN IS IN THIRD JAIL BREAK

Merry Promoter Fails to Escape; Several Make Getaway in Oregon.

KLAMATH FALLS, Ore., Oct. 1.—Several prisoners, including J. A. Thorne, nurse of Dr. Lyman of Oakland, Cal., escaped from the county jail here early today. The sheriff is searching for the escapees, but they are thought to have about seven hours' start and have not been recaptured.

Lyman's sore ankle prevented his escape. The prisoners climbed over the transom of the room in which they were locked and with some iron implement pried away bricks and cement over the top of the barred window in the corridor, making a hole large enough to crawl through.

Lyman, it is said, was able to climb over the transom, but the drop from the top of the jail window to the ground was so far that he feared to make further attempt to secure his liberty.

There were about nineteen prisoners in the jail, but only five or six were taken into the scheme. The others slept undisturbed until this morning. It is not known definitely when the men succeeded in getting out, but it is believed the break was made about 11 a. m. The delivery was not discovered until this morning.

Sheriff Barnes immediately instituted a search. The prisoners, however, secured a start of at least six hours and their capture is believed to be very uncertain.

HARROWING DETAILS OF FLOOD IN PENNSYLVANIA

Number of Dead May Not Amount to More Than 150--Dam Known to be Defective.

AUSTIN, Pa., Oct. 1.—The circumstances of experts who submitted the report and will submit them to the Austin flood scarcely before its victims all had been claimed and its surviving spectators fully realized how great a tragedy the elements of war and fire had enacted, was lifted by dawn today, revealing a ghastly scene of death and devastation.

Austin itself, yesterday a busy mill town of 3,000 persons, is only a ghost of a town today. Tons to pieces by water and eaten by fire, the steel and charred remnants of its buildings, believed to hold the bodies of 300 or more persons, were strewn along the valley edge, piled in rows where the main street business section was, or swept in scattered masses down the ravine.

The principal business buildings included the brick structure occupied jointly by the Austin bank and post-office, the department store of A. R. Buck, the Goodyear hotel and the Commercial House and numerous stores. At either end of Main street, brick buildings acted as buffers when the twenty-five foot wall of water rushed downward with its mass of debris.

The wrecking of the dam was as complete as it was sudden. Two immense sections from top to bottom, 150 feet wide, were thrown out, bodily, like the immense gates of a canal lock. The outward swing was more than fifty feet and on each side the remaining structure began gradually to crumple away. Reports last spring had consisted of a patch of cement 14 feet square. The break was at this patch.

The cause of the break is a matter which the district attorney of the county will investigate. The Bayless dam was examined by experts more than a year ago and recommendations were made looking to its safety.

The district attorney has secured the covering in the yards, but elsewhere the outlook was all for peace. The special police patrolling outside the stockade had nothing to do but contemplate the rows of quiet workmen's cottages facing the shops which now occupied by unemployed strikers.

The strikers gathered in their regular Sunday meeting at labor temple and were addressed by their leaders. The public and press were barred from the meeting and only a general statement of what transpired within was given out. It was said that certain details of organization were worked out and that the men were instructed to conduct themselves in an orderly manner at all times and to stay at home as much as possible. The men were warned particularly against gathering in groups anywhere except at the labor temple, where those who have no families were urged to spend their time at the reading table.

With the McNamara trial less than two weeks away, those in charge of the strike said they would make every possible effort to prevent any demonstration by the strikers.

Leaders of both sides issued statements reiterating the claims they made yesterday as to the number of men who struck and the number that remained at work. Superintendent H. V. Platt of the Southern Pacific said that the Southern Pacific had at the labor temple, where those who have no families were urged to spend their time at the reading table.

MADERO ELECTED MEXICAN CHIEF

as Candidate for Vice President.

MEXICO CITY, Oct. 1.—Rising his bid for information received from various parts of the republic, Francisco I. Madero, whom the people of Mexico had officially elected president, declared today that he was not his candidate for the vice presidency. Jose Pino Suarez of Yucatan, also had been elected.

At the headquarters of the Catholic party, Gabriel Fernandez Sumellera, chairman of the central committee, said he believed Francisco De La Barra had been elected vice president.

The only thing that appeared so certain tonight was that Dr. Francisco Vasquez Gomez, independent candidate for the vice presidency, was named under in the federal district.

Madero announced tonight that at least one of the present cabinet, Ernesto Madero, the minister of finance, would remain. Minister Madero, however, it is said, on the ground that it might raise the cry of nepotism, but today he consented to retain the portfolio. The portfolio of foreign relations had been offered to Dr. La Barra, but he expressed his unwillingness to accept.

At 9 o'clock Madero's central committee, clothed in 50 per cent of the federal district, Madero-Suarez ticket. A third of the vote remained to be counted.

The electoral college will have no less than twenty thousand delegates, and party leaders announce that if the vote today indicates "Madero" they will not refuse working to change this in the vote of the electors on October 15th.

Grounds for a contest of the election may be found in the fact that a number of ballots were not opened. Up to midnight no news of any disorders in any part of the republic had been received.

CHARGES CONTROL OF INTERIOR DEPARTMENT BY LIQUOR INTERESTS

Indian Agent Resigns Job of Prosecuting "Bootleggers" That Live Off Red Men of the Western States.

DENVER, Oct. 1.—William E. Johnson, special officer of the office of Indian affairs, became vacant today by his resignation, issued a public statement in which he declares that his usefulness in the position which he is said to have created for the protection of the Indians has been practically nullified by an alleged cabal in the Department of the Interior at Washington and in New Mexico. In his statement, Johnson names Assistant Indian Commissioner F. H. Abbott of Nebraska and Assistant Secretary of the Interior Samuel Adams, formerly a Chicago lawyer.

"These two men," says the statement, "have done everything in their power to hamper, undermine and prevent the success of our efforts in catching reservation bootleggers. I refused to be reformed, but these men finally got me so bottled up that I could do little except mark time and draw my salary. I saw no other way to maintain my self-respect than to resign."

The retiring special officer, who says that since he organized the special service five years ago 3,400 convictions against persons selling liquor to Indians have been secured and that approximately a half million bottles of rum intended "for Indian stomachs" have been destroyed, charges that for ten years the Pueblo Indians of New Mexico have been systematically plundered of their pastures, being kept in subjection by the encouragement of drunkenness and debauchery.

BECOME ABSTAINERS. Two years ago, Johnson declares, most of the Santa Clara Indians,

through efforts of the special service, became abstainers and assisted in gathering evidence against "speakeasies." The continued evidence against a druggist in Santa Fe. No indictments were returned, in which connection, Johnson states that the foreman of the grand jury was a partner of Crandall.

"Next," the statement continues, "Assistant Commissioner Abbott compelled me to dismiss the two druggists who had been mainly responsible for the evidence gathered against the speak easy."

Johnson alleged—that when John Cruz, one of his deputies, killed a man in self defense, Commissioner Abbott ordered him to take no steps for the deputy's defense. Johnson says he appealed to Superintendent Crandall and to F. H. Wilson, attorney for the Pueblo Indians, and said to pay him a salary by the government, but both declined to assist in the defense.

The W. C. T. U. eventually raised a fund for this purpose and Cruz was acquitted.

Johnson further alleges that Abbott and Adams are now trying to find a way to disallow my account for expenses in the trial and compel me to pay the bills for witnesses' expenses, traveling money, etc."

RAILWAY OFFICIALS AND UNION LEADERS CONTINUE TO CLAIM AN ADVANTAGE

No Strike Disorders Reported ---Men Urged to Stay at Home---Calvin Claims Men Returning.

SAN FRANCISCO, Oct. 1.—E. E. Calvin, vice president and general manager of the Southern Pacific Railroad, spent the day compiling a list of men at work and on strike in the territory under his jurisdiction, which reaches from Ashland, Ore., to Sparks, Nev., and El Paso, Texas. He spoke out tonight his first set of figures on the situation, this being the only strike development on the coast. From all points were received reports of quiet, orderly meetings among the men, and very few trains were reported on time or with more than ordinary variations from schedule.

"Out of a total of 7453 men employed in shops, 4255, or 57 per cent, remained at work," says Calvin's statement. "The revised count of the general strike of the system at Sacramento shows that 2955 men were in the service Friday and that 1824 remained at work."

Defections in other places are given as follows:

City	Employed	Remaining
Los Angeles	145	86
Tucson	136	86
San Francisco	545	230
Oakland	1068	522
Tracy	84	24

TO RE-EMPLOY MEN. "A large number of men who went out yesterday having expressed a desire to return to work, master mechanics and foremen have been authorized to re-employ them under certain restrictions prescribed by the general superintendent of motive power," the statement says, adding that a number of applications for work have been received and accepted.

The figures given out vary greatly from the contention of labor leaders, for the reason that the company's totals are based upon the total number of men of every description employed in the yards, while labor leaders estimate on the number of union men involved. Thus, in San Francisco, where it is generally conceded that practically every man in the five shop craft unions involved in an strike, the company's figures still show 230 men at work, these being mainly painters, general workmen, and the like, it was said.

QUET AT LOS ANGELES. LOS ANGELES, Oct. 1. Forty Chinese helpers who remained at work in the Southern Pacific shops when the machinists and their affiliated craftsmen walked out yesterday were apprehensive of trouble as a result of the strike. They remained

covering in the yards, but elsewhere the outlook was all for peace. The special police patrolling outside the stockade had nothing to do but contemplate the rows of quiet workmen's cottages facing the shops which now occupied by unemployed strikers.

The strikers gathered in their regular Sunday meeting at labor temple and were addressed by their leaders. The public and press were barred from the meeting and only a general statement of what transpired within was given out. CALIFORNIA WILL HAVE TWO BEST TRAINS IN UNITED STATES

Running Time on Sunset
Route Cut to 70 Hours
and 50 Minutes.

Barber, Shower Baths, Hair-
Dresser and Ladies'
Maid on New Flyer.

J. F. Hixson, district passenger agent of the Southern Pacific, yesterday announced the installation of a new "Sunset Limited" train between San Francisco and New Orleans. The train is given out only for a run of three hours in the morning time between the two points and the new train will negotiate the distance in twenty hours and fifty minutes, running twice weekly.

The new schedule has been brought about by the fact that the winter travel on the Sunset route and to care for this new equipment is now being built in the Pullman shops at Chicago. The limited will be all steel. The cars will be of the latest design with mahogany finish and electric lighted throughout. This train is built for high speed and will consist of only six cars. These are dining and baggage car, a diner, three drawing room sleepers and an observation smoking car.

The sleeping cars will each contain ten sections, two compartments and a drawing room. They are being built with particular regard to the comfort of women. A ladies' maid, manicure and hair dresser will aid in caring for the needs of the fair sex. For the men, there will be a barber, shower

Face Paint Tabooed; Remove Skin Instead

"A few years ago only one class of women painted their faces," says Daily Madison in Chicago News. "It was a sign of social ostracism and was tabooed in refined circles. The custom has become so universal we must admit it is to be deplored and to be abolished as soon as possible."

How foolish to seek artificial "beauty" of this sort, obnoxious from artistic and moral standpoint, when it is so easy to obtain a truly natural complexion by the use of ordinary uncolored wax. Mercurized wax, obtainable at any drug store, is so effective, non-injurious and inexpensive, no one need think of using anything else for the purpose. Applied like cold cream at night, and washed off in the morning, it at once begins to show its remarkable rejuvenating effects. It gently absorbs the lifeless surface skin in tiny particles, showing the fresher, livelier, beautiful under-skin. Naturally it takes with it all surface defects.

A Typewriter You Can Afford

We have typewriters at all prices. They are machines that are as good as new. They have been used for a time, but we have given them a thorough over-hauling and every wearing part that shows the least wear has been replaced with a new part. They are in this way made as good as when they were new.

baths, arrangements for pressing clothes and a stenographer aboard for all. Telephone connections will be made at all terminals. The berths are to be electric lighted and the dust and dirt of the continental travel will be removed by vacuum cleaners which will do away with the offensive brushing in cars.

BUILT FOR SPEED.

Service on the "Sunset Limited" will begin December 4th from New Orleans and the following day from San Francisco. The trains will leave New Orleans on Mondays and Thursdays and San Francisco on Tuesdays and Saturdays. The running time between Los Angeles and New Orleans will thus be cut to fifty-six hours and fifty minutes and between San Francisco and New Orleans to seventy hours and fifty minutes, or less than three days for the trip that now takes more than four.

The time of the two trains has been arranged so that direct and quick connections will be made at ferry ends of the route with ocean steamships. The trains will be different from any other in the United States and the service, when inaugurated will be a unique departure in railroad history.

WEATHER MAN KNOCKS WORKMEN OUT OF JOBS

Hired to Stack Trays But
Reassuring Forecast
Ends It All.

SELMA, Oct. 1.—A large number of laborers, who were going out last night to stack trays at Selma, were told that the weather forecast was for rain and their hopes shattered when the local report of the weather forecast gave the farmers no indication of serious rain. When the heavy first blow up there was quite a scramble for stacks and many wagons were standing on the streets loaded with men when the news came that predicted rain. The local forecasts have been satisfactory so far this season, that the farmers are placing unusual confidence in them, and many of them unloaded the men upon receiving the special report.

FIRE DESTROYS C STREET DWELLING

Fire last night of unknown origin completely destroyed the home of J. Snyder at the corner of C and San Benito streets. The damage is estimated at about \$1,500. An alarm was turned from box 5, which is located at the corner of East San Benito streets. The fire department quickly responded but the firemen were unable to save the dwelling. Chief Wintemute last night was unable to find out the origin of the fire. Snyder did not know how the house caught on fire.

TO KEEP HER YOUTH, A WOMAN MUST
keep her health. All the "beautifiers" in the world won't do as much for you as Dr. Pierce's Favorite Prescription. With that, you can see the good that's done, as well as feel it. That regulates all the womanly functions, improves your digestion, enriches your blood, brings refreshing sleep, and builds up strength, and repairs every part of your system.

A course of "Favorite Prescription" will work marvelous benefit in all such cases, and generally effect a permanent cure if persisted in for a reasonable length of time. The "Favorite Prescription" is a harmless agent, being wholly prepared from natural medicinal roots. All its ingredients are printed on bottle wrapper.

To every one of the "female complaints" and weaknesses that make women old and miserable, the "Prescription" will certainly cure. It's the only non-alcoholic remedy.

HEALTHY MOTHERS

Women who bear children and remain healthy are those who prepare their systems in advance of baby's coming. Unless the mother aids nature in its pre-natal work the crisis finds her system unequal to the demands made upon it, and she is often left with weakened health or chronic ailments. No remedy is so truly a help to nature as Mother's Friend, and no expectant mother should fail to use it. It relieves the pain and discomfort caused by the strain on the ligaments, makes pliant and elastic those fibres and muscles which nature is expanding, prevents numbness of limbs, and soothes the inflammation of breast glands. The system being thus prepared by Mother's Friend dispels the fear that the crisis may not be safely met. Mother's Friend assures a speedy and complete recovery for the mother, and she is left a healthy woman to enjoy the rearing of her child. Mother's Friend is sold at drug stores. Write for our free book for expectant mothers which contains much valuable information, and many suggestions of a helpful nature.

NEW RECTOR TAKES UP HIS WORK IN FRESNO

Rev. R. W. Rhames Delivers
Initial Sermon at St.
James Church.

Rev. R. W. Rhames, the new rector of St. James' Episcopal church in this city, delivered his initial sermon yesterday at the morning service. The church was well filled and at the evening service another large attendance was recorded, notwithstanding the inclement weather. Rev. Rhames, a member of the church, the former pastor having gone to San Francisco to take charge of a parish.

The new rector made a fine impression upon his hearers and the sermon of St. James' Episcopal church in this city, delivered his initial sermon yesterday at the morning service. The church was well filled and at the evening service another large attendance was recorded, notwithstanding the inclement weather. Rev. Rhames, a member of the church, the former pastor having gone to San Francisco to take charge of a parish.

STEPS BACKWARD; STRUCK BY AUTO

Stepping back from in front of an automobile, C. V. Roberts, who is an employee of the local telephone company, was Saturday night knocked down by an automobile which was being driven by Mrs. Roy Stanley. The accident occurred at the corner of Fresno and Second streets. Roberts was taken to his home at 2245 Belmont avenue where his injuries were dressed by Dr. Harry Craycroft.

Roberts sustained a sprained ankle and several minor bruises. He will be laid up for a few days. According to witnesses, the accident was unavoidable.

Y. M. C. A. TO HOLD ITS OPENING FOR SEASON THIS EVENING

Building Will Be Thrown
Open to Public and Ex-
hibitions Given.

Will Perfect Plans for Physical Department During the Week.

The official opening of the Y. M. C. A. for the year will take place tonight, when the doors of the association building will be thrown open to the public. Both men and women are invited to the association building tonight. A reception will be given and everyone will be given a chance to visit all of the departments of the building under the guidance of a special committee. Music will be rendered in the club. The doors will be thrown open to the public at 7:30.

The first gymnasium event of the season will take place at the association tonight when two indoor basketball teams will compete in an effort to entertain the large crowd that is expected to visit the building. There will also be a number of the best swimmers of the Y. M. C. A. present and fancy exhibits of swimming and diving will be given. During the week, the physical director and medical examining committee will endeavor to make as many examinations as possible, in order that the physical condition of the men and boys who wish to enter classes may be secured.

The walls of the gymnasium have been tinted and painted a light green and the game lines have been marked. The floor has been varnished and in all the room is inviting as well as sanitary. Member this week will be able to get better attention in securing clothes and lockers than next week, as at that time the organization of the classes will take the greater part of the time of the physical director.

RELIGION MOVEMENT FOR MEN IS STARTED

Executive Secretary Speaks
at Y. M. C. A.; Committee to Start Work.

Preliminary steps toward enlisting men of this city in "The Men and Religion Movement," which at the present time is under way in the entire country, were taken yesterday afternoon at a meeting at the Y. M. C. A. G. W. Deaton, executive secretary of the movement, with headquarters in San Francisco, addressed a large gathering of men in spite of the disagreeable weather. He told the men of the movement and that success is being met with in the large eastern states.

At an after meeting it was decided that Fresno should take part in the movement. A committee was appointed to make plans for the coming of the leading speakers on the movement who are at present in the East but will be on the Pacific Coast in the course of the next few months. The committee which was appointed yesterday will study conditions at Fresno and will then be in a position to make a report to the leaders when they arrive. Those appointed on the committee were Rev. Thomas Boyd, Dr. J. M. Crawford, Dr. H. H. C. Avery and Mr. C. W. Allen. Dr. Charles L. Reed presided at the meeting. Before the meeting, the mandolin quartet rendered selections and Miss Maude Robinson sang.

F. M. HILL LEAVES FOR RATE HEARING

F. M. Hill, manager of the Fresno Traffic Association, left yesterday for San Francisco to attend the rate hearing of the San Joaquin Valley rate case which opens before the state railroad commission in that city today. The first few days will be devoted to presenting rebuttal evidence, after which the case will be argued and submitted for a decision.

FIVE MEN ARRESTED IN GAMBLING RAID

Five men were placed under arrest early Sunday morning by Police Detective George J. P. Patterson. The men were arrested in a gambling house in the 1200 block on F street. According to the police, the men admitted that they had been playing poker for money. The men arrested were: George Wilson, Nick Mints, T. Rhodes, Albert Koyck and James Gombaz.

PASSENGER TRAINS MEET HEAD-ON BUT NOBODY IS INJURED

No. 50 and No. 87 Have
Smash in Selma Yards;
50 Is Laid Up.

One Train Standing and
Other on Low Speed;
Engines Suffer.

Southern Pacific passenger trains No. 50, southbound, and No. 87, northbound, crashed into each other in the yards at Selma about 11:30 o'clock last night, when the brakes on No. 50 failed to work properly, it is said, and she did not take the siding. Passengers were shaken up but nobody seriously hurt. The fronts of both engines were damaged, and No. 50 was disabled for a time in the Selma yards. No. 87 was able to proceed and came into this city early this morning, subsequently proceeding north.

No. 87 had the right of way on the main line, and was waiting for the southbound train at Selma. No. 50 rolled into the yards, to take a siding, but moved so quickly that the switchman had not time to throw the switch and she went on down the main line and into No. 87's engine. Because of the fact that the train was moving at low speed the light damage was comparatively slight. The men in both engines escaped without injury.

BARBECUED GOATS SERVED AT RIVER

The members of the Fresno bartenders' union and their friends had a number of more than one hundred, journeyed to Riverview yesterday where a big barbecue was held. This is one of the first events of a social nature that this organization has held and was a success in every particular.

Eight young goats furnished the meat for the occasion. These goats were put on the spits on Saturday and when the bartenders and their friends arrived, they were ready to be served.

The day was pleasantly spent on the river and with amusements of various nature, including contests, cards and story telling. Refreshments for the occasion were furnished by several local establishments. The bartenders' union has only been in existence for a few months and yesterday was the first opportunity given to have an entertainment of any sort. The committee having the barbecue in charge was P. D. Lachar, F. W. Meyer and P. L. Grace. The merry-makers left for Riverview yesterday morning at 9:30 o'clock in automobiles and returned shortly after dark last night.

SURPRISE PARTY IS GIVEN MRS. HATCH

Mr. and Mrs. L. V. Hatch of 745 Jensen avenue were given a complete surprise last Friday night when about twenty-five members of the North Side Christian church called at their home. The jolly gathering was due to Mrs. Hatch's birthday and the party was a complete surprise to her. During the evening many games were played and musical numbers were rendered. Later in the evening refreshments were served.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, imitations and "just-as-good" are but experiments and endanger the health of children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

THE CANTARA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

MISSIONARY CAMPAIGN IN FRESNO PLANNED BY WOMEN

Committees Appointed to
Interest All Women of
the City.

Open Meeting to Be Held
Sunday to Further Out-
line Work.

To plan taking up of missionary work in this city on a larger scale than ever before, a meeting was held yesterday afternoon at the First Presbyterian church at which were representatives from almost every church in the city. The final outcome of the meeting was that committees from every church were appointed to visit the women members of the churches and interest them in this missionary work, both at home and in foreign lands. Another meeting will be held next Sunday afternoon at 3 o'clock, at the First Methodist church, and every person interested in the work will be asked to attend the meeting and discuss the work with the committee.

The taking up of the work in the United States is the outcome of the Woman's Jubilee campaign. This campaign, which is going on this year, marks the fiftieth anniversary of the part that woman took in the missionary work. Mrs. W. H. Peabody of Boston, who has written books on missionary work and is a hard-worker in that line, conceived the idea of starting a nation-wide movement for the Christianizing of the world. At the meeting, the work that had been accomplished during the past fifty years was discussed and statistics were read which showed that only 10 per cent of the women in the churches are interested in this missionary work. Mrs. Peabody said that something must be done to interest the majority of the women of the church and her idea is now being carried out in many meetings that are being held throughout the country.

NOT CHURCHES ALONE.

The first plan of the work is to get women interested. The campaign will not be confined to women members of the churches but every woman in this city and practically every woman in the United States will be asked to give her aid in the great missionary work. The missionary work in many of the large eastern cities has been taken into the heart of society and many society women who never dreamed of the work have become interested and are now among the principal workers for the Christianizing of the world. The campaign is being taken up by the members of their churches who are not interested in the missionary work are: Mrs. H. Z. Austin, First Presbyterian church; Miss Penton, Calvary Presbyterian church; Mrs. H. E. Allen, Baptist church; Mrs. Wakefield, First Christian church; Mrs. Walker, Cumberland Presbyterian church; Mrs. Skinner, Belmont Presbyterian church; Mrs. W. H. Smith, First Methodist church; Mrs. Jackson and Mrs. J. P. Strout, St. Paul's Methodist church; Mrs. Anderson, Church of Nazareth; Mrs. Zasper, North Side Christian church; Mrs. Thomas Hughes, Grace M. E. church; Mrs. W. G. Harris, Congregational church and Mrs. Edward Hughes, Episcopal church.

FRESNO GIRL AND LINDSAY MAN WED

Miss Marie Clayton, daughter of Mr. and Mrs. J. W. Clayton of this city, was yesterday morning united in marriage to Albert Rooke, Rev. Duncan Wallace, pastor of the Calvary Presbyterian church, officiated at the ceremony. The bride is well known in Fresno and the groom is a fruit man and is well known in Lindsay. Last night Mr. and Mrs. Rooke left for San Francisco, where after a short honeymoon, they will go to Los Angeles, where they will make their home.

JEWS OBSERVING DAY OF ATONEMENT

Yom Kippur, the Jewish day of atonement, following after the coming of the Jewish new year, will be observed in Fresno today by fasting and praying on the part of those of Hebrew faith. There will be no services here and many who have expressed a desire to attend services, have gone to San Francisco. Yom Kippur began at sundown last night and will continue until sundown tonight. Some of the stores will close. Neither food nor drink will pass the lips of the devout from evening to evening.

The orthodox, following the practice of their ancestors, wrap themselves in the burial shroud, divest themselves of all earthly cares and remain in devotion for the entire twenty-four hours.

California Oil News

WATER FROM LAKEVIEW CANNOT BE SHUT OFF

Union Wants to Demonstrate This By Pumping, Say Oil Operators.

That the action of the Lakeview people in pumping out the water of the oil field is not for the purpose of demonstrating whether the water can be pumped, is the opinion expressed by oil men interested in that portion of the field. The action is said rather to be a move on the part of the Union Oil company to shut the water out of the bottom of the hole to shut off the water.

Water from the Lakeview well has been flowing into wells nearby and is said to have caused quite a good deal of damage. The Lakeview people have repeatedly been blamed for this condition and are liable under a state law for prosecution.

For this reason, it is believed, the pumping of the hole was started to show that it will be impossible to reach the bottom to shut off the water.

The hole has been pumped down about 40 feet below the level of the ground, although it was necessary first to pump out the water which is several feet above ground. A small pump has been used, and according to one or two who have viewed the well recently, it will be impossible to do much more with this. This pump has been let down into the hole by means of a plank and cable and is held above the hole.

The hole, through which the oil shot when the gusher was in its prime is about 40 or 50 feet in diameter and the sides are very smooth. The walls are perpendicular and there is nothing to indicate but what there are the same all the way down. The bowl, made of sacks of dirt, is more than 100 feet in diameter but this is above the ground.

UNIVERSAL CO. HAS ANOTHER GUSHER

BAKERSFIELD, Oct. 1.—The Universal Oil Company's No. 3 well on section 32, 26-21, on which work had been stopped to give the cement a chance to set, started flowing over the derrick yesterday.

The derrick started to drill through the cement a few days ago and it was not thought that there was any probability of the well breaking away but hardly had the drill entered the oil sand when the oil shot over the derrick and the workmen had to run to cover.

Fortunately for the company the well choked up after flowing a few hours and gates are now being placed on the well to hold back the oil as soon as the hole is cleared out.

BELTRIDGE COMPANY HAS FIVE WELLS

BAKERSFIELD, Oct. 1.—W. T. Davis, who was in from McKittick yesterday, says the Beltridge people have five wells producing, the yield ranging from 250 to 300 barrels per day. The 300-barrel well flows. The company is down about 2100 feet with a test well.

The survey for the Lost Hills-Tu Kern railroad runs close to the Beltridge wells, and Davis says he is assured that the road will soon be built. The Sunset Security Oil Company on section 28, 11-23, is running out the hard shell in which the 10-inch casing was cemented and will put down the 8 1/4-inch casing into the barren sand tapped below.

SOME DYING, SOME LIVING

When people are dying in the hospitals and homes of this city as they are every day from Bright's Disease and Diabetes, how can physicians, patients or their relatives overlook such occurrences as are daily being reported at 445 Battery street, San Francisco?

The last few days' mail contains the following:

John P. Newell of Tilden, Nebraska, reports that his wife has nearly recovered from Diabetes.

A letter from G. T. Montellus reports the recovery from Bright's Disease of a Miss Wayne of Delevant, Ill.

Stevens Brothers, at Woodstock, N. D., report two cases of Diabetes recovering in that town.

A letter from Mr. Joseph Justice, a business man of 352 Randolph street, Chicago, reports his complete recovery from a case of Diabetes.

Mrs. Daniel Meyer writes from Bethlehem, Pa., that she is on our Compound due to the fact that her doctor says she "must have it." She is getting such good results that four of her friends are on the treatment.

A dentist living in San Diego reports his recovery from a serious case of Bright's Disease, and we are handed the names of two people in Oakland, one of them a railroad man, whose recoveries are nearly complete.

Please bear in mind that these recoveries are in cases that are supposed to be incurable the world over. Physicians declare the incurability of both Bright's Disease and Diabetes. We are advised of recoveries every day. How can the people and the profession overlook these facts and hold themselves to treatment that is admitted futile when it is a simple fact that many of these cases can recover?

Fulton's Renal Compound is the one used in Bright's and Kidney Disease. Fulton's Diabetic Compound in Diabetes. Patterson Block Pharmacy, Agents.

MIDWAY PREMIER WELL MAKING 800 BARRELS

No. 1 Formerly 56,000 Barrel Gusher, Is Now Doing 600 Barrels.

BAKERSFIELD, Oct. 1.—The Midway Premier has finished its well No. 12, which is the fourth drilled, and is getting therefrom a production of 800 barrels of 21 gravity oil per day. This makes four producing wells for the company and No. 11 is now drilling. Well No. 1, which came in last November at the rate of 56,000 barrels per day, is flowing now at 600 barrels. Except for one brief period when it was sanding up, this well had been a steady producer, always on the job. The immense flow of the first day continued but a short time, of course, but since the gusher got down to a 10,000 barrel gait, the falling off has been steady and gradual, and the year's record will show the old Premier No. 1 to be one of the best producers of the famous North Midway gusher belt.

The Kopsell Oil Company, which is operating on the rich section 3, 32-28, is now holding the job of putting in heavier casing in its well No. 1 to replace the old casing that collapsed at the perforations under the heavy strain to which the pressure of gas subjected it. At the time of the collapse the well was flowing 700 to 1000 barrels per day.

BIG YIELD IN MIDWAY FIELD IS ESTIMATED

Production for September Will Greatly Exceed 2,000,000 Bbls.

BAKERSFIELD, Oct. 1.—With the Santa Fe and Honolulu gushers keeping up a good rate of production, the output of the Midway field for September will run over the two million mark is the prediction of oil men. There will also be a big gain in the production of the Maricopa field, owing to the completion of a number of wells on the east. With the increase in production the troubles of the transportation company will be on the increase too.

OIL NOTES FROM MARICOPA FIELD

MARICOPA, Oct. 1.—The Fulton Oil Company expect to erect five new rigs in the near future.

A new lease, known as the West Virginia, has started rigging up a rotary derrick and will probably start by some time this week. The new lease is located on section 8, 11-23, adjoining the August and Esperanza leases. Harry Olney is acting in the capacity of superintendent.

From all reports, the Coronation Oil Company seems to be unable to cope with the trouble it is having with a well on section 4. The company is thinking of cementing in an effort to shut the water out. The rotary tools formerly used have been replaced by a standard string of tools.

The American Oilfield well No. 2 on the Midland lease, section 32, 11-23, is still flowing at a rate of 500 barrels daily. The company has resumed drilling on well No. 3 after a shut-down for nearly a month, which was necessary after it had been cemented. The American's property on section 14 and 15 has been closed down temporarily.

MIDWAY SOUTHERN DOWN 1840 FEET

MARICOPA, Oct. 1.—The Midway Southern Well No. 2 on section 8, near Junction with the Zierath combination rig, and encountered the first gas after passing through about 700 feet principally of blue shale, but interspersed with hard packed sand and gravel, hard shell, hard sand rock, three feet of quicksand and water and some gumbo. The formation is probably the hardest encountered in the Midway field, the drill after the first 60 feet having passed through yellow clay and gravel for the next 400 feet, and the same formation interspersed with large and small boulders, hard packed sand, 10 feet of conglomerate and some sand rock, until a depth of 1134 feet was reached in a 17-inch open hole. At that depth the hole was deepened in size to 13 inches, and on account of the gas and the several cavities recently passed through, the 12 1/2-inch casing will be set at once and be followed with 5 1/4-inch casing until the oil sand is reached. The indications for a good well are excellent. The drill is now in hard blue shale and hard blue gumbo.

AUGUST IS HAVING TROUBLE WITH GAS

The August Oil Company, operating on section 6, 11-23 is trying to drill No. 1 well in the sand. The heavy gas pressure has prevented continuing work on this well, which has blown the tools out over the derrick several times. It was found necessary to pump mud into the well under high pressure in order to cement the water off. It is believed the gas pressure is shut off now and the well may be completed without further trouble. It is evident that it will be brought in as a big producer.

After each blowout, which is frequent, the well sands up nearly 500 feet. The company expects to put in about 50 feet of pipe screening to remedy this defect.

M. AND M. IS DOING ABOUT 500 BARRELS

BAKERSFIELD, Oct. 1.—There is considerable activity on the Layman properties at Maricopa. The M. and M. Consolidated's No. 1 is producing on an average of 500 to 700 barrels daily, and the completion of rig No. 1b has been completed on the next location adjoining on section 34, 11-24. This M. and J. well No. 1 has been sanded up for the past two weeks. It is believed that this well was effected by the death of the famous Lakeview gusher, as the output and gas pressure was very much greater after the big gusher ceased flowing, and the well finally sanded up.

BURGLAR IS CHASED TO "WHISKY ROW"

COALINGA, Oct. 1.—At an early hour this morning, W. A. Chivers of 170 D street, heard a man at the front window. Slipping into the room, Chivers saw a burglar in the act of passing a box through a raised window. The burglar, with Chivers in pursuit, fled. The burglar was chased to Whisky Row, where he was lost sight of.

TULARE NEWS NOTES

TULARE, Oct. 1.—The bids for the construction of the new Junior school house, about seven miles west of Tulare, were opened yesterday morning and the contract was awarded to A. M. Brown of this city. There were two bidders, A. M. Brown for \$2,624, and J. A. McDonald for \$4,136. The plans are by a Fresno architect and call for one room, with cement porch and steps.

Charged with shooting firearms in the city limits, Ross Hunter and Roy Williams, Indians, were arrested yesterday on a complaint of H. M. Lutton and taken to Visalia to answer before the Visalia court.

Mrs. Wilcox, wife of Joseph Wilcox of this city, died at her home last night, of a second stroke of paralysis. The first stroke occurred about a year ago and the second stroke on the night of September 28.

Marion Mrs. Wilcox and family came to Tulare from Michigan about nine years ago and have made their home here since. Besides the husband, the deceased leaves the following children: Mrs. W. A. Smith, Elmer and Ethel Wilcox of Tulare, Mrs. J. P. Chidister of Redding and J. W. Wilcox of Maricopa, Mich. The latter started out Tuesday to spend the winter here with his relatives, but was delayed on the way by sickness. He does not know that his mother is dead. He is expected to arrive on any train, and on arriving to get the funeral will be made until his arrival. He has not seen his mother for nine years, and the news of her death will be a severe blow to him.

STATE LABOR COUNCIL CONVENES THIS WEEK

Many Delegates Expected to Be in Attendance at Bakersfield.

BAKERSFIELD, Oct. 1.—The annual convention of the State Federation of Labor will open in Bakersfield Monday morning, persons being held at this time. It is expected 200 delegates will be in attendance. Secretary Paul Schorrenberg is already on the ground, arranging with organizer E. V. Grubbs, Chairman C. T. Fletcher, Secretary M. J. of the local Labor Council, and President A. J. Kinn. Among those who will be in attendance are Andrew Furuseth of the Coast Seamen's Union, Walter MacArthur, editor of the Coast Seamen's Journal, and Mayor E. H. McComb of San Francisco. The Merchants' Association will provide a luncheon and automobile ride to the Kern river and Stockdale, the home of W. S. Tevis. The delegates will also attend the Francis J. Henry meeting at the opera house Monday night.

The convention will occupy the entire week, coming to a close Saturday afternoon. With the exception of Monday, when the delegates arrive, business sessions will be held every morning and afternoon. No pains have been made for any evening session. The convention will be called to order at a cockade Tuesday morning.

State organizer E. V. Grubbs will act as timekeeper at the banquet to be given Thursday night and toast will be given by state and valley labor leaders, as well as by prominent officials of Kern county.

The Littlest Stove The Biggest Utility

THE electric stove is a little stove, light and handy to carry about, but it is a great success. It is perfectly clean. There is no soot, no smoke, no odor, no ashes, and nothing that is objectionable.

You can use the electric stove in any room in which there are electric lights. It is attached in the same way. It takes but a moment's time to attach it and but a moment to heat the stove. It is the quickest and most convenient way of preparing meals.

Health, Wealth and Happiness

"The Land of Kerman"

The "Land of Kerman" can well be called the land of health, wealth, and happiness. It is the land of health because the climate is so dry and healthful that invalids soon get well and sickness is almost unknown. It is the land of wealth because the land is so wonderfully productive that 10 acres means independence and 20 acres means wealth. When bought on the easy terms that we are giving, it is within the reach of all. It is the land of happiness because the people who buy here are free from sickness, they have assured incomes, and they are on the road to independence and eventual wealth. It is only 45 minutes to Fresno by automobile, thus providing good markets and a good place to trade. The roads are good, there are telephones, electricity, and rural delivery. The "Land of Kerman" has everything to recommend it.

When you buy in the "Land of Kerman" you leave Want on the road behind you. You are headed toward prosperity. The "Land of Kerman" is free from stones and alkali; it has first water rights and a bounteous and dependable supply of water from Kings River. Water can also be secured at the depth of 40 to 80 feet. The land will produce nearly every variety of fruit and produce in quality and quantity that makes it profitable to grow. Alfalfa is also a profitable crop to raise and a good market is close at hand. Another industry that pays well is dairying. Oranges ripen earlier in the "Land of Kerman" than elsewhere and secure the highest prices. Lemons, peaches, figs, grapes, corn and vegetables all reach their greatest perfection in the "Land of Kerman." There are many crops that can be raised in these lands and all of them are money-makers.

Opening The Second Section

This is the second section of the "Land of Kerman." The first is already settled by hundreds of happy families. The land has amply proven its value, and the thousands of acres under cultivation show what the tract that is now being sold will do. You who buy now get the result of the experience of others. You will have their advice and their help. You will soon have homes all paid for and increasing rapidly in value. These lands increase each year in value from \$25 to \$50. Buy now and reap the profits of these advances.

INTELLIGENT VOTING

Twice in the past two years the voters of San Francisco have performed the impossible—they have voted intelligently on an unimpeachable ballot.

The first time was the charter amendment election. There was a huge blank sheet of propositions, at least forty if we remember right, good ones, bad ones, and indifferent ones, all mingled and printed on a ballot in incomprehensible legal verbiage. It was a task to tax the skill of the most stupid of the people of San Francisco, the stupid and careless with the wise and careful, did solve the problem. The vote in every case was either certainly right, or at least definitely right. Every proposition whose success was certainly necessary was passed. Every proposition whose defeat was certainly necessary was defeated. And every proposition on which an intelligent difference of opinion was possible was solved in a way which even the defeated side would regard as defensibly reasonable. Most of the action of the people, even on this impossible ballot, was certainly right, and none of it was certainly wrong. The most expert legislative committee could not do better, and would probably do much worse.

The next occasion was last Tuesday's election. There was an unconscionably long and complicated ballot, such as no free people ought to have imposed on it. There were 246 candidates for 31 offices, including 174 candidates for the eighteen supervisoryships. There were no distinguishing marks of affiliations or endorsements after any of the candidates, nothing but the names, not even grouped. And yet the people did vote intelligently even that preposterous ballot. As witnesses:

For mayor there were six candidates, yet there were practically no "nesting" votes. Mayor-Elect Ralph got 26,497 votes; Mayor-Elect McCarthy 26,587; Wm. McDevitt, the Socialist candidate, got 4,588, which is no more than his middle-of-the-road party vote; while the two volunteer candidates got 210 and 50 votes respectively. The tail-end candidate was one Luigi Bonagione, who had a wagon parading the streets announcing himself as the "Lincoln-Roosevelt" candidate. His 50 votes were scattered through all the 38 districts of the city, no district giving less than one or more than six votes. Yet the out-and-out Lincoln-Roosevelt League vote in San Francisco is at least 20,000. The districts McCarthy carried extend from the ferry building south of Market around the water front and up to the more settled residence district of the Mission. They are all small districts with few permanently resident voters. The rest of the city Ralph carried, including North Beach, the Barbary Coast, and Telegraph Hill.

In the gaffe way, there were ten candidates for district attorney, including some very well known men, but the two leading candidates received between them 57,493 votes, while the other eight only received 19,232 all combined.

The Supervisors were the hardest proposition. The Municipal Conference, a volunteer organization with no claim on the people except the confidence they had in its exceptionally high-class membership, had endorsed eighteen men for the eighteen places. The Republican and Democratic parties had endorsed eighteen names each, but more than half of them were men already on the Conference ticket, and some of the others were on both party tickets. The Union Labor party endorsed eighteen. Counting duplicates, however, less than fifty candidates had received even one endorsement, and even these did not have any notation of the endorsements printed on the ballots. Over 125 of the candidates were endorsed by nobody. But when the people had voted, every one of the top 25, who will go to the general election, was found to be an endorsed candidate. All eighteen of the Conference candidates are included in the 25, and 13 of them are in the top half of the list. The Republicans and Democrats have 14 each, and the Union Labor party 14. Taking only the first 18, there are 13 of these having all three endorsements; 13 with the Republican, 15 with the Democratic, and 10 with the Union Labor endorsement. Out of this list, the election of a good board of Supervisors at the November election is an absolute certainty.

San Francisco may or may not be intelligent. Certainly some of it is not. But this is intelligent voting.

GIRL AND RESCUER

WASHED OVERBOARD.
A brave attempt to save the life of a girl passenger caused the death of A. H. Ballantine, third officer of the Allan Line steamer Victoria, from Liverpool, which docked at Calumet street wharf.

From accounts given by members of the crew, it appears that the girl, Mary Morgan, of St. John, N. H., was last seen alive at the aft rail of the ship on the night of August 26. The ship was heading in deep seas, and Miss Morgan had a death grip on the rail. Officer Ballantine, who saw her plight, it is believed, made a desperate attempt to reach the girl, when the ship gave a terrible lurch, and the supposition is that he and Miss Morgan were thrown into the sea.

HARROWING DETAILS OF THE FLOOD IN PENNSYLVANIA

(Continued from Page 1)

A large number of the dead are children. Lloyd Lockhard, a young business man of Austin, had a narrow escape. Lockhard said that when he heard the alarm, he thought some one was playing a practical joke, and he went into the street to watch the actions of the populace. He looked in the direction of the dam, and saw the on-coming flood was but three blocks away. "It looked like a wall of water, 25 feet high," he said. "At first glance, I did not see the water at all, because the wind at the pulp mill was carried before, bounding up the hill, carrying the town. I ran towards the hill and by the greatest effort got above the level of the water while it was surging within ten feet of me. The ground was very muddy and I was very tired. I managed to climb a fence of light iron, and caught hold of a tree to which I clung."

THROGS OF BIGHTSEERS.
Throgs came to the town today from all points in the valley before Austin, and the extent of the damage, and to find relatives or friends. The rush of water had carried away every means of wire communication. J. C. Borchard, who lived within half a mile of Costello, said that when the great flood swept past his home there were no signs of human beings or their houses in the debris. The entire surface of the flood was covered with newly sawn timber and pieces of lumber. It was not until a lapse of five or six minutes that pieces of houses, broken furniture and other evidences of the destruction of the town began to appear.

"The people of Costello," he said, "received ample warning from Austin that the dam had broken and although forty-five houses were demolished, only three fatalities occurred."

MANY AT BALL GAME.
The annihilation of Austin came on a beautiful autumn afternoon. The fine weather had attracted many of the younger element to a ball game in a nearby town, and thus the streets were empty. Women were about the streets for their Saturday shopping and those and the merchants who were selling their goods were caught by the flood.

Small crowds also were amusing themselves at moving picture theaters, which were swept away by the war. Women looking their babies at home and others preparing their Sunday meals were hurled into eternity before they could realize the danger.

The greatest loss of life by fire occurred at a sharp turn of the valley below Main street, where the debris was caught and compressed with terrific power before the current. The wreckage of the business part of the town was carried to that point and from upon stone and lamp it caught fire. It is believed that scores of persons are buried under from ten to twenty feet of wreckage there and the task of recovering them will be difficult.

FIRES STILL BURNING.

In a driving rain, which changed to a beating storm, hundreds of volunteers carried on the work of rescue, while many, hysterical, viewed the muddy corpses, anxious to know if any of them were their loved ones. Fires still were burning brightly in some portions of the wreckage this afternoon, although they had been under control several hours.

The Buffalo and Susquehanna Railroad found a way into Austin today by connecting with the Keating Summit and a narrow track that followed the hill. By this route they landed several fire companies from Olean, Galton, Renova and Smithport.

Not a manufacturing industry is left standing and not a business place intact. A few cheaply constructed wooden houses remain, but they are isolated and located on the hillside, and a fortunate exception to the general destruction is the fact that the little hospital on the hillside remained unharmed. The school building also was saved.

STATE POLICE.

Chief of Police Daniel Baker of Austin, one of the survivors, with the assistance of Ernest Hamilton and a number of constables from nearby towns, maintained as good order as could be expected throughout the night and until the arrival of a company of the state constabulary this morning.

There were eighty mounted men in the state squad, but on account of the wreckage in the valley, it was not practical to picket the ruins on horseback. Lines were established and only workers and searchers were allowed to pass.

There was little pillaging in the course of the looting. Chief Baker discovered a man and a woman removing a watch from a man's pocket, but the attempt to arrest them was useless, and the pair got away after some rough handling by the crowd. In the wreckage of three stores he found that the property had been looted.

ELECTION INTERRUPTED.

A primary election was in progress in the town hall when the flood broke. A bullet man dashed by, yelling to the crowd about the booth something about the dam bursting, and the election inspectors and voters dashed out and took to the hills, leaving their ballots unmarked. Some escaped, but many were too late and were whirled into the debris which formed a dam of itself just below Main street. The bodies of the victims were at least seventy-five feet high and three or four blocks long.

In this mass, the bodies of the majority of the victims are believed to lie, mangled and burned. The bodies of houses, twisted telephone poles, huge sections of brick wall, trees and timbers are so interwoven that the rescuers have to fight their way inch by inch.

Five hundred or more men were at work in the ruins today. Heavy logging ropes were used about the bigger pieces of wreckage and with two or three hundred men turning, the ruins were forced apart, often to fall again into the tangle and make work more difficult.

PART OF COSTELLO SAVED.

The dam of debris formed at Austin saved the western part of Costello. It saved the onrush of the current sufficiently for the alarm to spread down the hill. By this route the residents of Costello had time to flee to the hills. The eastern side of the village, however, was destroyed entirely, rendering about 400 people homeless. It is believed that only three lives were lost and of these, only one body, that of an unidentified woman, had been recovered today.

The work of clearing up the debris is under the direction of State Senator A. T. Baldwin, who lost his father, mother and wife and home in the flood, and who himself was painfully hurt in escaping the disaster. During the night food supplies were scarce and the rescuers, many of whom were unused to such heavy work, toiled without so much as asking anything to eat. Several of them collapsed today.

NEW YORK.

Governor Dix telephoned from Albany today that the state of New York was prepared to send any number of

BRIEF EDITORIAL FANCIES SELECTED

San Francisco To Clean Up

The primary election in San Francisco has resulted in a victory for the gruffers and the rotten type of the citizenry that has existed for the past few years. McCarthy has been relegated to the political scrapheap of "humbies." He was too rank for the labor union vote and too rank for the "business" vote. The people of San Francisco and California at large will rejoice over this victory and will start the work for the big exposition of 1915 with renewed vigor and earnestness.—Oxnard Courier.

Pays To Be Decent

San Francisco has voted Mayor P. H. Ditch McCarthy down and out and has substituted a reputable businessman, James Rolph, in the office. The majority for Rolph is a large one, and Mr. McCarthy is very much in the dust. The result came about, no doubt, in large measure because the people of San Francisco realized that if the Panama exposition is to be the success it should be, San Francisco would have to throw off some of her corruption. Many a business man voted for Rolph yesterday for commercial reasons only. The only hope for the future with that class of voters is that the Rolph administration may be so great a success that they will see that it actually pays in real money to be decent.—Redlands Facts.

Refers might need as soon as Pennsylvania would signify what would be acceptable.

There was no lack of willing hands. Country women from miles around drove to the scene and between comforting the bereaved and survivors and getting luncheon for the survivors they were busy all day and into the night. Meanwhile men fought their way through woods and brush for a mile or more to get pure water for coffee and farmers drove in with large supplies of fresh milk.

In order to be fed one had to be vouched for as a resident of the flood stricken town or a commissioned flood worker. Guards were placed at the door of an old wooden building that stood outside the path, where the workers and survivors were fed, and saw that the rule was enforced.

RATIONS ISSUED.

Later in the day, after the supply trains had arrived, three loaves of bread, a can of corn and a two-pound can of yeast beef were issued as a day's rations to the head of each surviving household.

Two morgues were established during the afternoon. One is in the high school building and is for the reception of all bodies taken from the east side of the valley. The other is in the Old Fellows' building for the bodies taken from the wreckage on the west side of town.

Following the arrival of a special train with state health officials, a meeting of the officers, surgeons, physicians and nurses was held, at which an executive organization was formed. A relief and supply committee was formed.

A census of the living and dead is being made. As many of the survivors are foreigners, it is hard work, but it is hoped to complete the census by tomorrow.

BEREFT FATHER INSANE.

One of the most pathetic in the long list of tragedies is the case of James Leeman, a night worker, who was asleep at his home and did not hear the alarm. When the rush of water swelled up his home he was tossed out upon a pile of floating debris and eventually landed a mile and a half below the village. Wounded and bruised, he returned to find that his wife and four children had perished. Leeman went violently insane.

W. D. Robertson, night watchman at the Bayless mills, was asleep in the third story of the Starweather building when roused by the roar of the flood. He stepped out on the balcony commanding a view of the onrushing waters.

"Houses were hurled about like works," he said. "I was transfixed with horror, unable to take a step, my eyes were closed and then collapsed. I fell two stories with the building and found myself protected by a bridge which had been formed by wedged timbers. I made good my escape."

ESTIMATES OF LOSS.

Estimates of loss of life in the flood that overthrew the town of Austin yesterday amounted today when an army of volunteer rescuers worked its way into the masses of wreckage. In the opinion of many on the ground the number of deaths will not reach 150, while the less hopeful place the list of fatalities at 300.

The property loss will reach \$6,000,000 and it is the general opinion that the town never will be rebuilt. Two of the large plants will not be reconstructed and a majority of the business men of the town have been ruined financially.

State officers in charge of the situation after a hasty canvass of the population, expressed the belief that not more than 150 are dead. Only sixteen bodies had been recovered at a late hour tonight. Chief of Police Baker, however, believes that fully 200 are dead or missing.

The 500 men who had toiled all day in a heavy rain storm abandoned their task with the coming of darkness. Although they had moved heaps of debris, fought the fire and worked on without food, seeking to remove the bodies of the dead, less than a score of dead had been found.

A battalion of state police then surrounded the town and no person without a pass was permitted to enter. Reports from Costello and points further down Susquehanna creek grew more encouraging as the day advanced. At Costello, while there was a heavy financial loss, it was said that no more than three persons were dead. Beyond that point, no fatalities had been reported.

ASSISTANCE AMPLE.

The survivors will not suffer from hunger or lack of medical aid, as the supplies of medical assistance seem ample. T. E. Hicknell, national director of the Red Cross, arrived today, bringing with him cash for the same. He said that the flood victims are in good luck. Of the injured fatally.

The homeless all have been provided with shelter. On the outskirts of Austin are a number of houses that were vacated by workers in the Good-year mill when that plant was dismantled. The houses have been made habitable. The residents of Keating Summit have taken in the others, several hundred in number.

Many evidences of the tremendous power of the flood were seen today by the workers in the town. Enormous weighing twenty-ton logs had been rolled along the ground, an immense steel member was carried half a mile and thrown through the side of a

POSSIBLE USE OF AEROPLANES IN AID OF CRIMINAL DESIGNS

It has been suggested that the ease with which any one may become possessed of a machine which will enable him to go at will to any point through the air will give an enormous power to criminals in the conduct of their nefarious designs. This is a doubtful truth, and there are many precedents for such a conclusion. Other scientific developments have been seized upon by evil-disposed persons, and much harm has followed. The use of dynamite in government is to be committed, and the employment of high explosives has extended the scope of the bank burglar; while accounts of highway robberies conducted with the aid of automobiles are not unknown.

Any source of power in Nature may be abused, and it is not to be supposed that the machine which has provided a new, powerful, and wholly personal method of locomotion will be free from such abuse. One of the functions of government is to maintain order, and if the introduction of aerial navigation may be followed by a new method of evading it, it will doubtless become one of the changed details of government to cope with the fact. It is possible that the great difficulty of catching and punishing evil doers who may use the new ad-

house, and steel freight cars were both double.

The greatest damage was done by the piles of cut lumber, swept before the flood. These acted as great battering rams which swept buildings from their foundations and unquestionably caused the deaths of scores who otherwise might have escaped after surviving the first rush of the water.

Investigation into the cause of the breaking of the dam will begin immediately, according to officials in charge of the work of rescue. That there had been constant danger at the catastrophe of yesterday due to the instability of the structure, was known to many residents of the town and a thorough investigation is demanded by survivors.

FISHER DEFENDS LAND POLICIES

Says Present Federal Laws

Encourage Coal Development.

CHICAGO, Oct. 1.—Maintaining that the policy of the United States government with regard to the valuation of coal lands is not open to the criticism of the coal industry, Secretary of the Interior, Walter L. Fisher, Secretary of the Interior, tonight made public his reply to protests against that policy submitted to him last night by representative Frank Mondell of Wyoming.

Mondell charged that prices fixed by the government were prohibitive; that they paralyzed the coal industry in the West, resulted in increasing the cost of coal to the consumer from ten cents to a dollar and created a monopoly.

Mondell also said that prices for coal lands in all the working fields run from \$150 to \$500 an acre; that millions of acres are at values above \$150 an acre, that prices in the better fields are in excess of those charged in commercial practice in the same fields or for better grade coals in eastern fields.

All these allegations Secretary Fisher, after thorough study, submits as unwarranted. He says that the coal lands are valued on the basis of which valuation is made, as to the prices placed on coal lands and as to the effect which the classifications have had on the sale of public lands.

"The prices now fixed," Secretary Fisher continues, "are designed not to create monopoly in the hands of present owners of coal lands, but to prevent monopoly by making it unprofitable to purchase large areas for indefinite holding without development."

"This in fact is the constant aim of the department in the prices which it puts upon public coal lands—to make them low enough so as to encourage purchases for immediate development, yet sufficiently high as to discourage purchases for speculation or for monopoly."

NOT FOR THE MONEY.

"Prices prohibiting development would be inimicable to the present interests of the West; prices permitting purchases with a view to monopoly would be inimicable to their future interests. The sole object therefore is to value the lands so as to permit development and to prohibit speculation."

"In view of all the facts, however, I am convinced that the prices now being placed on the public coal lands are neither unreasonable nor exorbitant. The increase in the value of coal lands for the four-year period subsequent to July 1, 1907, in comparison with the preceding four-

ALL WRONG.

The Mistake Is Made by Many Fresno Citizens.

Don't mistake the cause of backache. To be cured, you must know the cause.

It is wrong to imagine relief is cure. Backache is kidney ache. You must cure the kidneys.

A Fresno resident tells you how. Dr. G. E. Clark, 1816 E. Broadway, Cal., says: "I can still recommend Doan's Kidney Pills as a first-class remedy, for I have not forgotten what they did for me when I first used them. For two years I suffered almost constantly from kidney complaint and overwork, or the contraction of a cold was sure to bring on a severe attack. Finally I had to give up my work and I was confined to my bed for over a month. The kidney secretions were scant and painful in passage, and though I doctored, I did not improve. When I was suffering from an unusually severe attack, my son read about Doan's Kidney Pills and procured a box for me at the Baker & Colson Drug Co. I had but little faith in this remedy, but nevertheless I began its use. I felt relief in a day or so, and in a few days I was able to get about. The contents of the second box of Doan's Kidney Pills restored me to good health. I consider it my duty to make the merits of this remedy known."

For sale by all dealers. Price 25 cents. Foster-McMillan Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no other.

THE DOCTOR SAYS NO! NO HEART TROUBLE—IT'S GAS IN YOUR STOMACH

Pressing against your most vital organ—the heart—and affecting every organ in your body, making you dizzy, irritable and generally miserable. You distended stomach will reduce by inches, because gas simply cannot form after a few days' use of Baalman's Gas-Tablets.

If you wish to be permanently relieved of this in the stomach, take two Baalman's Gas-Tablets for a few days. Baalman's Gas-Tablets are prepared distinctly and especially for stomach gas, and particularly for all the bad effects coming from Gas Pressure.

That empty, gone and gnawing feeling at the pit of your stomach will forever disappear in a few days; that anxious and nervous feeling, with heart palpitation, will vanish and you will once more be able to take a deep breath, so often prevented by gas.

Your limbs, arms and fingers won't feel numb and go to sleep, because Baalman's Gas-Tablets prevent gas interfering with your circulation. That intense drowsiness and sleepy feeling after dinner will soon be replaced by a desire for some form of entertainment.

Belgian Consul of San Francisco Hon. Ferd. Wodon says: "Baalman's Gas-Tablets have certainly done wonders for me. I leave in a few days for my new post in Brazil, and shall take at least a dozen bottles with me for my friends who may suffer like I have done."

These peculiar tablets are sold for sale a bottle by nearly every druggist. If not in stock tell him to get them for you from his wholesaler, or send lettering with your circulation. Write to Hahnemann Pharmacy, 324 Sutter Street, San Francisco.

year period, together with the present condition of the western industry, demonstrates conclusively that the present classification policy is not open to the criticism which you make."

Secretary Fisher suggests that a liberal but wisely protected leasing law might be found to promote development more vigorously than any system of outright purchase, such as has been the case in Australia and New Zealand and adopted by Canada in its Yukon territory.

Referring to Mondell's charge that millions of acres are at values above \$150 an acre as "the highest price paid" by coal purchasers, Secretary Fisher says there cannot be millions of acres of classified lands so rated, since only 16,000 acres of coal lands in the country have been priced to date.

Referring to Mondell's charge that the government was prohibitive; that they paralyzed the coal industry in the West, resulted in increasing the cost of coal to the consumer from ten cents to a dollar and created a monopoly.

Mondell also said that prices for coal lands in all the working fields run from \$150 to \$500 an acre; that millions of acres are at values above \$150 an acre, that prices in the better fields are in excess of those charged in commercial practice in the same fields or for better grade coals in eastern fields.

All these allegations Secretary Fisher, after thorough study, submits as unwarranted. He says that the coal lands are valued on the basis of which valuation is made, as to the prices placed on coal lands and as to the effect which the classifications have had on the sale of public lands.

"The prices now fixed," Secretary Fisher continues, "are designed not to create monopoly in the hands of present owners of coal lands, but to prevent monopoly by making it unprofitable to purchase large areas for indefinite holding without development."

"This in fact is the constant aim of the department in the prices which it puts upon public coal lands—to make them low enough so as to encourage purchases for immediate development, yet sufficiently high as to discourage purchases for speculation or for monopoly."

Hogan's Villagers Again Lead the League

SHOWERS UP NORTH PULL BEAVERS TO SECOND PLACE

Seals and Portland Idle;
Vernon Wins Two From
Los Angeles.

LOS ANGELES, Oct. 1.—By winning today's double header from the Angels, Vernon obliterated the lead of the Seals and pulled the Beavers to second place in the league. Both of Hogan's victories today were easy. In the morning game the Villagers scored three runs on four hits, a lucky three-bagger by Patterson sending in the winning rally. In the afternoon game the game was a hollow affair, Vernon winning, 10 to 2. Scores:

BEN HILL'S CURVES PROVE TOO MUCH FOR CLOVIS; BIG MAN STARS

Captain of Bittels Poles Three Hits in Three Trips;
Harry Johnson Has Tigers Eating Out of His Hand; Ostrander Slams the Pill

BITTELS, 4; CLOVIS, 2.
Ben Hill was "right" yesterday and there was no horsehide luck attached to his 1 to 2 victory over the Clovis Roosters at Recreation Park. If you believe it, figure it out yourself. Here is the dope-sheet. Hill allowed three hits in seven innings, walked one and struck out seven. Isn't that performance good enough to win most any game? We think so and to prove that Big Ben is something besides an arm clock, we hereafter quote his batting average. Three hits in three times at bat—two singles and a two-bagger to the fence. His batting average was a thousand because he didn't have any chances.

Carl Merriman pitched, or tried to pitch, for Clovis. He was hammered for twelve hits, three of which were batted for more than one bug. West garnered a triple and Reuter and Hill poked out two batters. Harbour and Ward did the redeeming work for Clovis, although Madden showed a flash of speed in one double play with Ward. The Bittels victory practically clinched second place for Ben Hill and Company.

MONTE ATTELL TO MEET JOHN DALEY TONIGHT IN THE SOUTH

NEW ORLEANS, Oct. 1.—Monte Attell, former bantamweight champion, completed two weeks of hard training at Bay Street club house for his ten fight tomorrow night with Johnny Daley at the New Orleans Club. There was equal confidence in the camps as to the outcome. Attell has a shade in the betting.

BASEBALL BUNTS

WASHINGTON, Oct. 1.—Hugh Jennings, manager of the Detroit American League team, is considering a proposition to become manager and a stockholder in the Washington American League Club.

PORTLAND, Oct. 1.—San Francisco, Portland game postponed; wet grounds.

The Moose team lost to Le Grand on the latter's ground yesterday in a hard hitting game. The score:

Le Grand: 12 11 14
Moose: 11 11 14

Edwards, of the game were the hitting of Bradburn, the new star of the Moose team, who secured four hits, a home run, a triple, a double and a single, the triple and two singles of S. Burns and a home run by H. Burns.

The Le Grand concert band furnished music during the game. The Moose will play at Madara next Sunday.

RUPTURE CURED

McAfee's, 3; TIGERS, 2.
With two down in the last of the eighth, the Tigers heaved the pill to the grandstand. Reg Danner took one wild swing for his third strike and dashed to first. McAfee's inched back sent the sturdy captain to second from where he scored the winning run on Sherry Ostrander's scorching two-bagger to right. This tells the story of the whitewash finish staged by Charlie McAfee's out. The Tigers were the victors. The Tigers were the victors and Harry Johnson did the timing act. Before the game was broken by Ostrander, the little pitcher had Port's men eating out of his hand. Five hits were all he allowed and the Tigers were lucky to see home plate.

Smiling like Tufts heaved a good game but the McAfee's got to him with men on bases. Two-buggers by Adams, Milt Maul and Ostrander practically won the game for the Tigers. McAfee's was working the all the way. The second game was just as snappy but was marred by a rank decision by Umpire Pickett who called Pete Miller out in the third inning when the runner ran into Milt Maul, the catcher, while rounding third base.

Pickett did not see the play but Captain Preston of the Tigers did. That settled it. Preston called Pickett's gun as the little umpire called Miller out because the Tiger captain wanted it to go that way.

Miller was out but Pickett did not view the interference and had no right to give a decision when he didn't see it. Danner had just slammed the pill into center and Pickett and Tufts were watching the ball and not third base. The figures:

First Game.

ABR.H.B.H.S.P.O.A.E.	TIGERS	McAfee's
Wagner, 2b.	3	0
O. Preston, c.	3	0

Two base hits, Adams, M. Maul, C. Maul, Ostrander; sacrifice hits, Ostrander, C. Preston. 2; first base on called balls, off Johnson, 2; struck out, Johnson 4; by Peter 2; by McAfee's 2. Bases on balls—off Johnson 2; off McAfee's 2. Struck out—Johnson 4; by Peter 2; by McAfee's 2. Umpire—Pickett.

NATIONAL LEAGUE

Bad weather prevented more than two of the National League clubs from playing a game Sunday but these two happened to be the leaders in the pennant race.

The game resulted in a victory for New York by a shut-out score, making the series an even break. It increased New York's lead over Chicago to 86 points. New York's advantage now being so great that should Chicago win all the remaining seven games, New York will have to win but three of her remaining twelve to capture the flag. Should Chicago win all and New York but two, a tie for the pennant would result. The standings:

Clubs. To Play. Won. Lost. Pct.
New York 10 2 92 .548
Chicago 7 87 .500
Philadelphia 10 73 .582

CHICAGO, Oct. 1.—Chicago's pennant hopes are not improved by the New York when the visitors what out the locals 5 to 0. About the best Chicago can expect now is to tie the Easterners for the pennant as New York is 7½ games in the lead and Chicago has only seven remaining games on the schedule, while New York has twelve games to play.

Today's game was a pitchers' battle between Marquard, who was easy for the locals in one of the previous games, and Riehl, who won the opening game with ease. But Marquard showed his old form and was almost invincible. He allowed the locals six scattered hits, while Riehl, who held the Easterners to three hits up to the eighth, weakened and was hit hard.

Seven hits in three innings and seven runs for New York. Chicago got a man as far as third in the second inning and again in the seventh inning. Once again they got a man as far as third in the ninth. Score:

Chicago: 5 0 0 0 0 0 0 0 0 5
New York: 0 0 0 0 0 0 0 0 0 0
Batteries—Riehl and Archer; Marquard and Myers.
Umpires—Hennan and O'Day.

DOC FUNK FIGURES IN SECOND WIN OF BRAVES

Ex-Tiger Drives in One of Hanford's Runs; Cubs Fall to Defeat.

HANFORD, Oct. 1.—The Braves won the second victory in the five game series now with the Los Angeles Cubs, at Athletic Park this afternoon by a score of 4 to 0. The first game played in Lemoore a week ago to 0 in favor of the Braves with Hawley pitching and with this second shut-out over the Cubs, Hawley seems to be invincible against Mackley's squad.

The game was fast throughout and though the crowd was small, those who witnessed it enjoyed every minute of the play.

McCaslin delivered the pill for Lemoore and was only fairly supported. He was hit hard in one or two innings, but gave for a little while the rest of the time he was there with steam and a good break.

A feature of the game was the cast work of Capt. Hamilton, at second. He covered his territory and was fast and accurate with his wing. Martin behind the bat supported Hawley well and threw to the bases good. Newport, Trippett and Hilton in the outfield beat the Cubs out of several hits and Tognorini, Funk and Harris in the infield were principals in a couple of "big league" plays.

For Lemoore Klein, Ragan and Henley played fast ball and Weisbaum, at first made one dandy one-handed stab. Hanford's first run came in the Hamilton drove a hit on center and hit to Henley and reached first on an error. Trippett hit safe to center scoring Hamilton and a moment later Funk went home on a passed ball. McCaslin struck the next two men out and Henley and after McCaslin had gone out and Hawley had reached third on a wild pitch, Funk tapped one past third and scored Hawley. Trippett dropped easy out at first and after Newport reached first on an error the side went out when Henley caught Harris' line drive.

In the seventh frame, Hanford secured his fourth run. Hawley sent one out to Apperson through the infield and dropped it. This was followed by a safe hit by Hamilton, an out by Funk and a base on balls for Trippett. Newport went out on a foul fly to Ragan and after McCaslin had gone out and Hawley had reached third on a wild pitch, Funk tapped one past third and scored Hawley. Trippett dropped easy out at first and after Newport reached first on an error the side went out when Henley caught Harris' line drive.

THE SCORE:

TOURING IN AUTOS TO BE BOOSTED IN EAST

Meeting Will Be Held October 8th; Good Roads Are Being Sought.

Automobile touring will be given a decided impetus at a conference of the officials of the Eastern states having under their jurisdiction the regulation of motor vehicles, who have been invited by the secretary of state of New York to meet at the capitol at Albany on October 8th.

This action taken on behalf of Secretary of State Lusk is well commended by the entire automobile industry, as well as owners and users throughout the country, notwithstanding that a great improvement has been made in the automobile laws of many states as a result of the regulation of the Touring Club of America which a year ago called the first conference of this character at which ten states and the District of Columbia were represented. At this meeting recommendations were made providing for a uniform touring privilege of fifteen days for non-residents touring in other states, which were subsequently adopted at a conference of governors.

In this respect the forthcoming Albany conference will naturally call particular attention to Road Users Day which will be one of the important features of the first American Road Congress to be held in Richmond, Va., in November under the auspices of the American Association for Highway Improvement, at which President Taft is to deliver the opening address.

Road Users Day will be under the

direction of the Touring Club of America, and the program, which is being planned, will include speakers who are acknowledged as authorities on traffic ordinances, motor vehicle laws and regulations governing the general use of the public highways.

It is expected that besides members of the Interstate Commerce Commission and Federal Highway officials, the nearly every state in the union will be represented by one or more of its highway or motor vehicle commissioners.

"There are many important phases pertaining to automobile touring which should be standardized in the various states," said Frederick H. Elliott, secretary of the Touring Club of America, "and it is in the interest of the general public that uniform regulations should be placed at least eighteen inches above the ground and in a position where they will be unobscured from view and where dust or mud cannot be accumulated. The authorities of adjoining states should adopt a schedule a year in advance to prevent the issuance of number plates by neighboring states of a similar color combination. A uniform law providing for the display of lights on all vehicles at night is a necessity, as evidenced by the many accidents during the past few months.

The state statutes should be uniform as regards speed regulations and revocation of licenses to operate motor vehicles should be on the statutes of every state, as this only through the granting of such authority that safe and sane driving can be assured."

The Touring Club of America is co-operating with the federal and state authorities to promote the best interests of automobile touring and is interested in the betterment of touring conditions and improved highways.

EGGENTRIC OUTFIELDER CLIMBS ON WATERWAGON—HITS AT .335 CLIP

Some of the Trials and Tribulations of Muggsy McGraw
When Rube Fenton Took a Drink Too Often; Wife Figures in the Play.

The newspapers always referred to Rube Fenton as an eccentric outfielder. His way of playing consisted in the fact that he would play his first against his capably. Muggsy McGraw apparently had none of the worst of the battles, for it usually took Fenton a week or more to get back into the game after a party. Still, he managed to hang along with the Giants, for every one knew his capabilities as a player, and there was always the chance that he would reform.

The public heard of all his exploits and also of McGraw's clever scheme

THE SPORTING WORLD

OUTLOOK FOR FOOTBALL SEASON

By TOMMY CLARK.
KING FOOTBALL is now in the limelight ready for another season of springs, splits, armies, forward passes and the like. He has had a long layoff and consequently is primed for the time of his life. From now until the last week in November the whirl of the pluck, will hold lovers of the checkerboard game in its grasp.

The 1911 football season promises to be one of the most successful in the history of the game. The new rules reduced the number of accidents to a minimum last year, and the rules now modified promise to practically eliminate all danger of players being seriously hurt.

There have been no radical changes made in the rules from those of last year. A simplified wording of the old rules is about all that has been done.

It was the forward pass that came in for the most attention from the rulemakers, and there is much speculation as to whether in its new dressing it will be a success.

According to the new rule, a forward pass is illegal when the player receiving it falls to hold on to the ball.

Another important change in the code is that which lessens the time between quarters. Last year the players were obliged to wait so long before resuming play that they became thoroughly chilled, their muscles stiffening, and preventing them from putting up their best game.

Now the teams will only pause long enough between quarters to permit of their changing goals.

In the future the umpire will keep time instead of the head linesman. In the past, when the captain wanted to call a halt he had to go to the side lines in order to post the linesman, so time could be taken out. The head linesman will also judge all outside plays instead of only those made by ends, as heretofore.

The candidates for all college elevens east and west have been at work for the past few weeks, and now that the weeding out stage has been reached a good line on the different elevens can be given.

Harvard Has Problem.
Harvard's list of games never has been so hard as this year, and while much of the old material is at hand again severe losses have come to the rush line, which must be rebuilt, with the exception of two positions, Crimson has a real wealth of ends and backs, but the men for the rush line are either green or inexperienced or have been passed down from previous squads without having shown particular promise.

Harvard will have her main problem to face in the line. At the end there appear to be but three players who have the call over the others of the squad—Hogers, Smith, and Follen. Rogers played on the 1909 eleven. Smith has been playing varsity ball for two seasons, and Follen is by far the best punter on the entire squad.

The two vacant tackle positions may be the weak points of the team. Gardner, Storer and Howard appear to be the most probable choices at present.

Captain Fisher will play at right guard and Kenney, Hitelesch and McGuire will contest for left guard. Huntington and Storer are the only known candidates for center.

In the back field material the situation looks the rosier, as all three of the veteran quarterbacks of a year ago are eligible—Wigglesworth, Potter and Gardner. Morrison and Wendell will probably alternate at fullback.

As there is a wealth of material for halfbacks Campbell and Ted Prothingham will have to fight for their positions this season. Armstrong, Tom Everingham, Reynolds and Reynolds will be among those to make things interesting for them.

Yale In Sore Straits.
It will not take a very sanguine soul of Yale to predict that Blue will have a better season this year than it did last—that is, a better preliminary season. Looking over the field of candidates, the outlook does not seem particularly bright for a great team at Yale this fall. The absence of six star men of last year's eleven must be filled, and the coaches and Captain Howe realize that

that is a harder job than the ordinary Yale men realize.

Johnny Kilpatrick, one of the best ends Yale ever had and a member of two All American teams, will be missed more than any two men in the Yale eleven of a year ago. He was the most feared end on the gridiron last year. Brooks and Vaughn, ends; Fuller and Childs, guards; Morris, center, and the entire back field—Daly, Field, Cores and Kistner—have been graduated.

These veterans will be greatly missed. Seely, McDevitt, Captain Howe, Baker and Paul are the only veterans of last year's eleven who returned, but the

freshman team of a year ago has furnished many likely candidates.

Captain Foss, the speedy quarter, and Gattins, at fullback, should fill a part of the gap left by the graduation of the stars of a year ago, while Gallagher and Harbison, ends, should give a good account of themselves.

Penn's Outlook.
Pennsylvania's outlook, however, is not very bright. The back field, always a power with Red and Blue elevens, promises to be below the standard. The first string backs will be competent, but there is a dearth of substitutes such as were available last autumn without in any way weakening the attack or defense. Also, the team loses decidedly in defensive strength.

Regarding the individual back field, Barr, Minis, Kennedy and Mercer will undoubtedly start the season behind the line.

The line this year will be an improvement. This may offset the back field weakness. Of last year's varsity squad Miller, Wolfert, Rogers, Morris, Dillon, Jourd'et, Spruance and possibly Jack Nolan will again be in harness, while the entire freshman line will be on deck.

Marshall, who is said to turn the hundred in ten seconds flat, is expected to make one of the best ends that Pennsylvania has had in years.

Cornell's Bright Prospects.
Cornell started off with brighter prospects than for a number of years on account of the large number of men from last year's eleven who are eligible this fall and the efficiency of the coaching system, which is regarded as the best in years. Last fall Cornell developed a lot of green men into a fairly good football team. This year the coaches hope to reap the reward.

From last year's team ten men should be available. They are: Vaughn, at left end; Munk, Weekes and O'Rourke, tackles; Dobson, Hale and Champion, guards; Whyte, center; Butler, quarterback; and Bates and O'Connor, halfbacks. There is a strong probability that Nichols, one of the halfbacks who left college last February, will be back this fall. The losses are Seagrave, end; Simon, fullback; and Robb, halfback.

In addition to this regular varsity line, good substitutes are available in Baker and Teague, ends; Zeller, Austin and Franklin, guards; Stinson, center; Smith, quarterback; Edgar, Luther and Carey, halfbacks, and Gass, fullback. Some of the best of last year's freshman back are also being tried for the varsity, including Dill and Fritz, fullbacks, and Hawkins and McDevitt, fullbacks. It is reported that Underhill, the big fullback of the freshman team two years ago, who was not eligible last fall, will make the team this year.

Princeton Men Optimistic.
The spirit of optimism as to the success of the football team is prevalent among the students of Princeton. Though, to a great extent, this may be the result of enthusiastic hopes, the facts in the case warrant a feeling of confidence, for there is considerable material of a high order, and the coaching system seems to be the best tried at Princeton.

Graduation claimed but three of last year's varsity men—Macgregor, tackle;

Spartan, halfback, and Elmerworth, tackle. In addition, the team suffered a severe loss in Patton, the punter, who left college in the spring.

The candidates for the various positions are as follows: Hittchcock, variety center, is sure of his position if he is up to his game; McDevitt and Wilson, guards, are much in the same way, provided Wilson succeeds in removing his conditions.

Perhaps the one department in which the team may be said to be weak is the kicking. There is not a consistent drop kicker or punter in the squad. The coaches, however, are conscious of this

weakness and will work hard to develop such kickers as are needed.

Brown.
While a number of good men have left the line and back field, Captain Sprackling, Brown's brilliant quarterback, is assured of having a sufficient nucleus of last year's aggressive combination to make a creditable showing against the best of the big teams. Sprackling expects to repeat the overwhelming victory scored over the sons of Eli on Yale field last year.

Marvel, Kratz, Adams, Crowther, Whitmarsh, Rosenberg, Westworth and Kenney are doing splendid work. Crowther may be shifted to halfback. Kenney's new acquisition, is a dashing youngster.

Navy and Army Prospects.
The fact that the annual contest between the elevens of the Naval and Military academies will this year break the record of the seven victories of one service team gives special interest to the football season at Annapolis and West Point this year. Last year the Navy won a field goal being the only score of the game. This year neither team lost heavily by graduation, and one of the stiffest games in the series is expected.

Football at the Naval academy has a bright outlook.

The filling of the tackle position is the most serious proposition which faces the coaches. The team lost by graduation not only King and Lottin, the regular tackles, but Douglas and Merrill, the best substitutes. Davis and Lattimore, both of whom entered the academy last year, are the most promising tackle candidates at present. The other regulars who graduated are Wright, left guard, and Clay, halfback.

The regulars who will make up an excellent nucleus are Dutton, halfback; Rover, fullback; Brown, quarterback; Weeks, center; Brown, right guard, and Gilchrist and Hamilton, ends. For positions back of the line McDevitt, Coghlan, Austin, Elmer, Byrd and Shaw are the best men. Watson will start the season at guard. There are numerous promising men as substitutes in all the positions.

The Army prospects for a strong team this year look exceedingly good. The candidates have lost only three men by graduation, these being Hicks, left end; Weir, right guard, and Surber, fullback. The balance of last year's eleven have all signified their intention to come out again this year.

Besides the many left over from last year's second string men the coaches are fortunate in having thirty new men, the largest class in the history of the academy to draw from.

Syracuse.
The material at Syracuse is heavy and strong and there is plenty of it. The line at Syracuse this fall will be a tower of strength. Reeves and Probst, last year's backup guards, are still difficult. The pivot position, made va-

lued by the graduation of Captain Harry D. Hartmann, must be filled.

There is a great dearth of back field material. C. D. Hittchcock, the regular quarterback, will not do his best in the early spring months, and the body in a long time. The ruling is certain to result in deciding the strongest team and will do away with the discarded opinion as to their strength. By this ruling the comparative score method will not be used.

Minnesota should have a powerful eleven and if coached properly should have a successful year. Wisconsin should be runner up, with Illinois a close third. The Hoegers should have a strong team judging by the reports.

Minnesota.
Although Minnesota has lost three players since last year, the Hoegers will be rejuvenated by a strong eleven this

season. The absence of McGovern, crack quarter; Johnson, fullback, and Young will leave a hole in the line.

All the other veterans are back. All except two or three will have a hard fight for their places.

Minnesota's line will be strong, with Captain Pickering and Frank at ends, Merrill playing his steady game at center, Walker, all-American tackle, and Robinson at guard. Harry Powers, who was ineligible last year, will be back in his old place at guard.

In the back field Rosenwald and Stevens, the two halves, are out to make the team. Len Erdahl is a speedy candidate for fullback. From these old men and the men who played sub last year, Randall, Knox, Vanstrom, Campbell and Rube Johnson, Coach Williams expects to build up a strong team.

There is a good working basis of old material and a wealth of new men.

Illinois.
The outlook for a winning football team at the University of Illinois is rosy.

The lineup as it appears at present will be Merrill, quarter; Sells, fullback; Dillon and Roberts, halfbacks; Prince, center; Oliver, left end; Hall, right end; Latham and Belting, guards; Wham and Spruance, tackles. With the exception of Prince and Hall all of the men played on last year's team. Prince was a star on last year's freshman team, and Hall has done some excellent work at end.

Seller at fullback is counted on to again use his valuable feet. He was last year's hero, having kicked a goal from the field in three games, thereby defeating Chicago, Indiana and Syracuse by scores of 3 to 0. Seller's playing had much to do in making the 1,000 per cent team last year.

Chicago.
Although he has plenty of material left over from last year, Coach Starg of Chicago is pessimistic. The handling of the Maroons sees no chance for an increased fighting staff unless some of the scholastic "grinds" show up strong.

Those who have been selected for the team are Captain Rudemacher, left tackle; Whiting, center; Whiteside, Sawyer and Freeman, guards; Falne, guard and end; Carpenter, tackle, and Kasulker and Sauer, ends. Sanning, who had experience on the varsity last

year, and Sellers, who played in the first game of the season and was forced to leave the squad on account of sickness, are other eligibles. Among the most promising of the freshmen line-men are Scruby, tackle; Harris, guard, and Miller, center.

The candidates for the back field will be newcomers, with the exception of Lawler, who practiced at quarterback last year, and Ira Davenport, who probably will join the halfback rank. Fletcher, the fast quarterback of last year's freshman team, and Morrison, who played with the yearlings two years ago, are candidates for the generalship. Sawyer, halfback and captain of the freshmen last year; Pierce, fullback; Molander, line-man and back, and Kennedy and Fitzpatrick are the best sophomore back field material in sight.

Wisconsin.
Wisconsin has an abundance of anti-season confidence somewhat misplaced in a squad of inexperienced though willing warriors.

Whether the new coach can smooth the wring of his candidates is purely supposition. The injury to Captain Al Buser, who had his shoulder blade broken recently, was a blow to the Hoegers. He was one of the best tackles in the west last year. Keckie, Moll, a quarterback of known ability; Bill MacMillan, a veteran guard and tackle; Hoeft, a speedy end, are the experienced men around which the machine must be built. In addition to these men, of whom Moll, MacMillan and Hoeft are surely dependable, he has a number of last year's second string men, mostly semixperienced.

Purdue.
Purdue has the brightest prospects that have confronted the Old Gold and Black in a number of years. While Athletic Director Hugh Nicol and Head Coach Marquis F. Morr shake in this feeling of optimism, they are conservative and will go no further than to say that they are satisfied with the situation and expect Purdue to do well this season.

Indiana.
With the loss of eight of last year's football stars by graduates last June, Coach Jimmie Shelden of Indiana will have the job on his hands of beginning with almost an entirely new team to represent the Crimson this year.

Iowa.
Iowa university, with the hardest football schedule in its history, faces smilingly the prospects of the best season that the followers of the sport have ever known.

Michigan.
Michigan will be represented by a powerful eleven this season. Coach "Hurry Up" Vost says no more husky looking bunch of football men has shown up at Michigan in years. This 1911 eleven will be heavier than Michigan has had for several years.

The Wolverines have many of last year's team left. Among them are Conklin, Hoagie, Quinn and Wells. All American end in 1910. Of last year's freshman eleven the men trying for the team are Patterson, Torbet, Craig, Pontius and Meek, all of whom are candidates for line positions with the exception of Jimmie Craig, Carpell, Roblee and Otis of last year's reserve, and Picard, sub-quarter back in 1910.

Among the other promising candidates are Patterson, Almondinger, old Ann Arbor high school stars, and Dalton, Macdonald, Houlton and Wiggins.

SUGDEN SCOUTING FOR TIGERS.
Joe Sugden, the former big league backstop, is now a Detroit scout. When he isn't scouting Jennings intends to use him as an instructor for young pitchers.

CAPTAINS OF THE LEADING EASTERN AND WESTERN ELEVEN

TIGERS WOULD HAVE WON PENNANT IF THEY HAD THE R DISCARDS

DURING the past four years Detroit has released three catchers and five pitchers who, if they were on the Naps payroll this season, would have clinched the pennant for the Tigers.

Stee being out, they have proved dependable, and in instances have turned out to be stars. Not only would they bolster the Tigers, but they would make a world's Championship to Detroit almost a certainty.

Warburton has worked in twenty games, and of these he has won eleven. He has pitched good ball in every one of them, and if he had a hitting team like Detroit back of him he would hardly lose one in four games pitched. Krapp is showing with a bang as one of the best of Cleveland's twirlers.

The catchers: Archer of the Chicago Nationals, Grech of the Brooklyn Nationals, and Gump of the Philadelphia Athletics.

The pitchers: Archer of the Chicago Nationals, Grech of the Brooklyn Nationals, and Gump of the Philadelphia Athletics.

He is a little fellow, but he is a world of spirit, and he is a real pitcher. He has pitched a number of low hit games this season and has won ten in seventeen starts.

Suggs has pitched grand ball for Cincinnati during the past two years. A few days ago he let Philadelphia down with one hit in ten innings and beat them in fourteen. He is Cincinnati's star twirler and is one of the best boxmen in the old league.

When with Cincinnati Rowan was a very dependable twirler. Since being with Philadelphia, however, he has not had the same chance to show. He is working with Alexander, Moore and Chalmers, and these three men have been pitching almost in turn during the season.

Archer is considered by many critics as the best pitcher in the National League. When with Naps in Archer caught good ball, but he is a little man and did not

MEETING NOTICES

 FRENCH LODGE, E. of P. meets at the old Masonic hall corner 1 and Tulare Sts., Wednesday, 8 p. m. Fred C. Ninkaya, C. C.

SHOPMEN CLAIM BEST OF FIRST DEVELOPMENTS IN THE STRIKE

Get White and Japanese Strike-Breakers Both Off the Job.

Will Hold Meeting Each Afternoon While the Strike Continues.

Shopmen of the Southern Pacific, who are out on strike here, held a meeting at Union hall yesterday afternoon, and gave out a statement that 97 per cent of their statement was represented. Further, they gave out statements claiming that the best of the first attempts that have been made to carry on work at the companies with out their help. It is said the first attempt to carry on work at the companies was made yesterday. It is said that the first attempt to carry on work at the companies was made yesterday. It is said that the first attempt to carry on work at the companies was made yesterday.

Five Japanese car drivers also went to work yesterday, but were subsequently pulled off the job. They were not approached personally, but union representatives talked to the Japanese contractor who had supplied the men, and he called them off.

All the Southern Pacific trains ran behind schedule last night, but this was said to be because of soft track. No. 40 was forty-five minutes late, the "Owl" forty minutes, the No. 8 but a few minutes behind time.

The strikers plan to have a meeting at Union hall each afternoon during the time they are out to keep together on the situation.

Both Chief of Police Jones and Sheriff McSwain have refused to take any hand in jailing the yards so long as there is no trouble. They have declared they will protect the railroad's property just as they would that of an individual, and see that the peace is kept, but go no further.

Shopmen declare that all but one union man here obeyed the strike order, and he did not because he has but two more years to serve before he gets the benefit of pension rules of the road.

Train No. 50 and the "Owl" went through here last night without changing engines, as has been customary.

BANKS WILL CLOSE WEDNESDAY AFTERNOON

A Skin Tightener To Reduce Wrinkles

(From Popular Medicine) In beauty culture, as in the treatment of disease, the tendency nowadays is to seek the removal of causes, rather than to treat symptoms or effects.

In the matter of wrinkles, for instance, we know that the lines or furrows are caused by the skin becoming loose in places, so it does not perfectly fit the flesh beneath. The skin then "wrinkles" or sags. Naturally the proper thing to do is to tighten the skin, make it taut, then there is no room for lines, wrinkles and sagging, and no more skin to sag or wrinkle.

SELMA PLANS TO PARADE HERE ON SECOND DAY OF THE FAIR

Big Show Due to Open Tomorrow, Which Is "Suffrage Day."

Spirited Rivalry Between Valley Towns for Honors Expected.

With the Fresno County Fair due to open tomorrow on the largest scale ever attempted, Selma boosters are planning to parade on Friday, Wednesday with a band, parade, and a delegation of several hundred strong. Selma boosters are planning to parade on Friday, Wednesday with a band, parade, and a delegation of several hundred strong.

As it is known Kernan, Linton and others are also basing planning to make their parades and displays that are worth while, it is now expected that this spirit of friendly rivalry between the county's thriving cities and towns is after all going to be a feature of the fair.

The Selma people will today put a proposition before the fair directors for arranging a parade of Selma's delegation on its arrival here Wednesday morning. If the parade is arranged, it is probable an effort will be made to get from the traction company two special cars to carry the Selma people to the fair grounds, so that they may descend on the grounds in a body, with their band and booster badges.

Bright and early today, the Selma committee will motor to the fair grounds and insist that the city have collected in the pavilion. V. R. Churchill of Kernan has already been busy with the Kernan exhibit, and the Fresno County Chamber of Commerce exhibit has been assembled at the building here, ready for installation.

Secretary William Robertson spent most of Saturday in the county districts, collecting fruits and other perishable farm products at the last possible moment in order to have them fresh.

Much of the live stock that has been showing at the Kings County Fair in Hanford, arrived here yesterday, to be added to the other livestock entered. More will arrive today.

Because of the big rush of work at the grounds today, in preparing things for the opening tomorrow, the gates are to be closed to the public, not to swing open until the big show is ready to start tomorrow.

Everything is being put in readiness for the handling of a very large crowd. Besides the delegations signed to come from the various towns of the valley and from San Francisco and the Bay regions, it is declared that thousands will be drawn here if interest should be taken in any indication. Reduced rates will be in effect on both railroads.

Tomorrow the opening day will be devoted to the suffragists. Miss Gail Laughlin of Denver, one of the best known pro-suffrage speakers now in California, is scheduled to talk on the equal suffrage amendment at the fair grounds at 1:30 tomorrow afternoon.

SAYS U. S. OWES DUTY TO THE NEW ORIENT

U. G. Murphy of Porterville Speaks on Awakening of the Asiatics.

U. G. Murphy, who at present is making his home near Porterville but who spent many years in the Orient, last night delivered a lecture at St. Paul's Methodist church, taking as his subject "The Claims of the Orient on America." He told of the way that the Orientals felt toward America and the American empire. He declared that the Japanese were just becoming used to American ideas and that they were assuming freedom of education, and in fact, of everything just as in the United States.

"As a matter of fact," said Murphy in part, "the American missionaries are destined to more in the Orient than those of any other nationality. It seems as if the Oriental realize that we are there for their good, and they know that the church and state in the United States are separate and that when we preach religion, we are not attempting in any way to govern them. They are not suspicious that we are in their country for political gain and power and over-crowd of the human race of Asia is now facing toward America and looking to us for modern methods.

"In Japan, more than any other country, the people have adopted the Americanized idea. The young folks are looking away from the old law and now the young people are looking to us for modern methods.

"The most serious problem that confronts the Orient today is the question of the Oriental race. In the past, boys and girls of the Orient have been sold into slavery and the girls have been sold into slavery and the girls have been sold into slavery.

"In Japan, a girl was suspended from school if she received a message from a boy, but these strict customs are now becoming a thing of the past.

"A Skin Tightener To Reduce Wrinkles

(From Popular Medicine) In beauty culture, as in the treatment of disease, the tendency nowadays is to seek the removal of causes, rather than to treat symptoms or effects.

In the matter of wrinkles, for instance, we know that the lines or furrows are caused by the skin becoming loose in places, so it does not perfectly fit the flesh beneath. The skin then "wrinkles" or sags. Naturally the proper thing to do is to tighten the skin, make it taut, then there is no room for lines, wrinkles and sagging, and no more skin to sag or wrinkle.

The best known formula for the purpose is: Boil one pound of salt with water. Use as a wash lotion. The effect is truly remarkable, especially as results are immediate. Ask the druggist for the powdered formula, which dissolves more quickly than any other form.

AGED WOMAN IS CALLED BY DEATH

Mrs. Mary J. McVay, who for the past four years has made her home in this state, passed away late yesterday afternoon at the home of her son at 344 J street. Mrs. McVay was 82 years of age and was a native of New York.

The funeral will be held this afternoon at 3 o'clock from Stephens and Benn's chapel. The remains will be shipped to Chicago, Ill., for burial. Mrs. McVay is survived by several relatives in this city.

Six Chinese were added to the county jail last night by Constable Ferguson from Selma. They are charged with gambling. The Orientals will be held in jail until this morning when they will be taken to Selma and given a hearing.

SOLDIER OF MADERO, FUGITIVE 4 YEARS, ARRESTED AT SELMA

Mexican Who Took French Leave From Park Is Caught.

After being a fugitive from justice since 1907, during which time he worked at Monterey and other coast towns and was a soldier in the Mexican revolution and fought under General Madero, A. Cruz, who escaped from the court house park while serving a 180-day sentence for battery, was arrested at Selma yesterday by Constable Harry Staley and was yesterday jailed in the county jail. Later in the day, Cruz was released by order of District Attorney Churchill, and he will not be prosecuted for escaping from the other in the park.

On September 1, 1907, Cruz was tried on a charge of battery at Selma and was convicted. He was sentenced to serve six months in the county jail. A short time after being incarcerated Cruz was made a convict in the park and he escaped. A search was made for him, but the officers failed to locate him and Cruz was finally forgotten. At the time of the Mexican escape, Staley was a deputy sheriff under ex-Sheriff Robert A. Churchill.

Since that time, Staley has been elected a constable at Selma. Friday the Mexican fugitive put in his appearance at Selma and was visiting with his old friends there. Staley recognized the man, but was unable to recall under what circumstances he last met the Mexican. Finally, the constable remembered that Cruz had been sentenced to the county jail, but had made his escape. Staley telephoned to the sheriff and after making certain that Cruz was still wanted here, he placed the Mexican under arrest.

SLIGHT SHOWER OF RAIN FALLS IN FRESNO; CLEAR TODAY

Heaviest Downpour Reported About Lone Star, Dinuba and Sanger.

September Cooler Than Normal According to Weather Report.

The city of Fresno was visited with a slight shower of rain yesterday afternoon, the total precipitation, according to the weather bureau, being .01 of an inch. A rain was heavier around Sanger and Lone Star and a large portion of that section this year will be unusually cool, says the weather man.

According to W. E. Bennett of the weather bureau, the storm yesterday was purely local. The clouds blew away shortly after 3 o'clock last night. Clear weather is predicted for today.

September was a rather unusual month, according to figures just compiled by the weather bureau.

The average temperature for the month was 69.8 degrees, that being 4.5 degrees below the twenty-four-year average. Three Septembers of the last twenty-four years have been slightly cooler, namely, 1904, 1909 and 1907, with average temperatures of 68.4, 68.2 and 68.6 degrees, respectively.

It is noted that the last three cool Septembers have followed some of the coolest Augusts on record, and that those of 1902 and 1900 were followed by cool Octobers. However, this fact should not be construed as any indication that October this year will be unusually cool, says the weather man.

The highest September temperature this year was 99 degrees, on the 1st and the lowest was 49 degrees, on the 26th. These extremes come well within the limits set by the September years. The greatest range of temperature was 38 degrees on the 1st and the least range was 15 degrees on the 26th.

Rain in measurable amount fell on the 25th and light sprinkles on the 21st and 28th. The total for the month was but .01 inch. The September normal is .27 inch. Five Septembers of the last twenty-four years have been drier. In five others but a trace of rain fell while in September 1890, 1898, 1904 and 1910, one inch or more was recorded.

SLEEPS IN GOODS BOX WITH A SHOE FOR HIS NIGHTIE

Thomas King was arrested early yesterday morning by Patrolman Harry Denbrook and charged with vagrancy. King was sleeping in an empty dry goods box and had on only one shoe. His hat and coat were also missing. He told the officer that he didn't know where he lost his wearing apparel, but that he was mighty cold.

ENJOYABLE CONCERT CLOSES PARK SEASON But Small Crowd Faces Cold at Ending of Successful Series.

But a handful of the old faithfuls faced the wet, cold weather last night and attended the closing concert of the season in the court house park last night. It was hardly a fitting end for a season that has been pronounced unusually successful. During all but the last few of the sixteen concerts given this summer under the direction of J. Wesley Tilton, attendance has consistently exceeded the records. The falling off did not come until the setting in of bad weather, and was due, it is believed, to this cause alone. Last night, it was pointed out that it has been possible this season to profitably increase the personnel of the band, and an unusual amount of really high class music has been furnished.

The faithful few last night heard a good program. Clarence Barton's latest concert in March time, called "The Fashion Show," was received with something that usually happens to things turned out by the local composer, "Les Hugonots" (Meyerbeer) was the most ambitious number and was ably handled. The sextet from "L'air" always a favorite, and another high spot in the evening's concert.

P. X. CLUB TO HOLD ELECTION TONIGHT

At 8:15 o'clock this evening, an important meeting of the P. X. club will be held at the Y. M. C. A. building. At this time a supper will be served during which time plans for the coming year will be discussed. Immediately following the supper a business meeting will be held and officers for the year will be nominated and elected.

The P. X. club is composed mostly of high school students although there are a few business young men in the club. The able study will be led by Judge H. Z. Austin. The meetings of the club are probably held every Tuesday night.

W. C. T. U. TO DISCUSS SUFFRAGE QUESTION

Fresno W. C. T. U. will meet at 2:30 this afternoon with Mrs. C. H. Jasper, 2023 I street, and as this is the last meeting before the election on October 10th, the program will be given over to the equal suffrage question. The responses to roll call will be "Who I Want to Vote," from the oldest member, who is seventy-six. The youngest, who is twenty, Mrs. L. Markley will speak to the members on the subject of suffrage. Mrs. A. P. Bolding will answer a few of the objections most frequently brought against it. Mrs. H. F. Wakefield will give a resume of an address by Rev. Anna Shaw on "Influence vs. Power." Mrs. L. C. Blair will give a reading, "Mr. C. V. Vote."

FRESNO JAPANESE HEAR SEVENTY-FIVE MEN OFF TO RIVERBANK TO LAY TRACKS

"Outfit Train" of 25 Cars Sent From Fresno to New Terminal.

Task of Putting Down Ten and One-Half Miles of Steel Before Them.

A Santa Fe "outfit train," consisting of twenty-five cars and seventy-five men, left here Saturday for Riverbank, the new terminal of the road. Most of these men are track-layers who will begin work tomorrow morning in the Riverbank yards. These workmen have before them the task of laying ten and one-half miles of tracks in the main yards there are to be twenty spur tracks, each 4000 feet in length, making 80,000 feet of rails to be laid.

Including curves and connecting tracks, it is estimated that the length of the rails in the yards when completed will be approximately ten and one-half miles. All steel, including work is now on the ground and work will start in earnest tomorrow morning. All grading work in the Riverbank yards is practically finished. The track-laying will cover two months.

At Calwa, the other new terminal point of the Santa Fe, several dozen turns and a half hundred men are still grading in preparation for the laying of tracks about the 20th of this month. Steel for this work is already on the ground at Calwa awaiting the completion of the grading.

Local Santa Fe officials announced yesterday that within the next few days a large crew will begin work on the closing of the gap between Dresden and Bakersfield, a distance of 10 miles where new 90-pound steel rails have not been laid. About the same time, another crew will close the gap between Stockton and Maltby, which is 42 miles north of the Slough city. These two steel gangs are now being assembled preparatory to shipping them to the designated gaps. When the heavy rails have been installed over this 90-mile stretch, the Santa Fe line between Bakersfield and Port Richmond will consist of nothing but 90-pound rails with rock and concrete ballast under the ties.

Word was received here last night from Riverbank by R. W. Hobart, commercial agent of the Santa Fe, that the remainder of the steel had arrived on the ground. The latest shipment of steel consists of frogs and patent switches which will be used in the yards.

U. S. GOOD CUSTOMER.

One of the reasons assigned by him for the desire of the Japanese nation to keep peace was that the United States is one of the best customers of Japan and that the friendly trade relations should not be severed.

Among the reasons given by him why America should not seek war was the fact that America was the first nation to declare for international peace. Another reason given was that America had the power to their present state of civilization.

Mr. Shimada arrived in Fresno Saturday night and yesterday was taken for a ride through the surrounding country by prominent Japanese of this city. From here he will go to Hanford and Visalia. He has been in the United States a little less than three weeks.

STATE SUFFRAGE ORGANIZER HERE

Miss Kate Ames, state organizer of the California Suffrage Association, and a director of the College Equal Suffrage League, spent yesterday in Fresno, enroute north. She came here from Hanford where she succeeded in perfecting organization and spent the day in conference with local suffragettes. She will leave this morning as Fresno is well organized.
